FERNS AND FLOWERING PLANTS OF SOUTH DAKOTA.

DEPARTMENT OF BOTANY AND ENTOMOLOGY.

D. A. SAUNDERS.

INTRODUCTION.

The results embodied in the accompanying catalogue are based on specimens in the College herbarium, and on notes taken in the field by Professor T. A. Williams and the writer.

The nomenclature followed is the modification of the Paris Code adopted by the Botanical Club of the American Association for the Advancement of Science at Rochester in 1892 and amended at the Madison, Wis., meeting in 1893. The only synonyms given are such as would be a help to one accustomed to using Gray's Manual.

In preparing this catalogue, Dr. P. A. Rydberg's Flora of the Black Hills* has been freely used. Specimens have also been received from various collectors in that region. Professor Williams has made extensive collections in the Sioux valley, has done considerable work along Bigstone Lake, and has made one trip from Pierre to Rapid City and return, obtaining many interesting specimens, especially from the Bad Lands. Messrs. David Griffiths, Earl Douglass, Jno. J. Thornber, students of Professor Williams, have done considerable collecting east of the Missouri river. Mr. L. W. Carter has made various collecting trips in the eastern part of the state, and, in company with Mr. Griffiths, one extended trip from Forest City along the Moreau river to the Black Hills, returning along the Cheyenne river to Fort Pierre. The

writer has collected over most of the state east of the Missouri river, and, in company with Mr. J. R. Towne, in the summer of 1897 made very careful examinations of the Little Minnesota river and its tributaries. On this trip many eastern species heretofore unknown to the state were obtained.

Acknowledgment is due Dr. N. L. Britton, Dr. P. A. Rydberg, and Messrs. Nash and Bicknell of the New York Botanical Garden, Dr. L. H. Bailey of Cornell University, and Professor Sargent of the Arnold Arboretum for the verification and determination of certain species.
CATALOGUE.

PTERIDOPHYTES.—THE FERNS AND THEIR ALLIES.

Ophioglossaceæ.—The Adder-Tongue Family.

Botrychium matricarifolium, A., Br., Matricary Grape-fern.
Two specimens doubtfully referred to this species were collected near Custer, in the Black Hills, by Dr. Rydberg.

Botrychium virginianum, (L.) Sw. Virginian Grape-fern.
In wooded ravines in the Minnesota region and in the Black Hills; rare.

Polypodiaceæ.—The True Ferns.

Onoclea sensibilis, L., Sensitive fern.
Near Rapid City, in the Black Hills.

Along shaded streams in the Minnesota Valley and the Black Hills.

On wooded hillsides in the Black Hills; rare.

Common throughout the Black Hills.

On damp shady banks bordering streams and lakes throughout the state.

Phegopteris dryopteris, (L.) Fee. Oak-fern.
In deep woods in the Black Hills.
Dryopteris Felix-Mas, (L.) Schott. Male-fern.
Among rocks in the Black Hills.

Asplenium trichomanes, L. Maiden-hair spleanwort.
Crevices of rocks in the Black Hills.

In the Black Hills.

In crevices of rocks in the Black Hills.

Adiantum Capillus-Veneris, L. Venus-hair fern.
Along a warm stream, near Cascade, in the Black Hills.*

Pteris aquilina, L. Brake.
Near Custer, in the Black Hills.

Pellaea atropurpurea, (L.) Link. Purple-stemed Cliff-brake.
Common in crevices of rocks in the Black Hills.

In limestone crevices near Bull Spring, in the Black Hills.

Cheilanthes gracilis, (Fee.) Mett. Slender Lip-fern.
On exposed rocks in the Black Hills.

Polypodium vulgare, L. Common Polypody.
In crevices of rocks in the Black Hills.

In crevices of rocks near Custer, in the Black Hills.

*Marsileaceae.—Marsilea Family.

Marsilea vestita, Hook & Grev. Hairy Marsilea.
Very abundant in swails and ditches from the James river valley westward to the Black Hills.

Equisetaceæ.—Horse-Tail Family.

Equisetum arvense, L. Field Horsetail.
   In low sandy soil in the Minnesota and Sioux valleys, and in the Black Hills.

Equisetum sylvaticum, L. Wood Horsetail.
   In moist woods in the Black Hills.

Equisetum fluviatile, L. Swamp Horsetail.
   In swamps in the Minnesota region.

Equisetum robustum, A., Br. Stout Scouring-rush.
   In wet places throughout the state; less common than the next.

Equisetum laevigatum, A., Br. Smooth Scouring-rush.
   In low wet places; very abundant throughout the state.

Lycopodiaceæ.—Club Moss Family.

Lycopodium obscurum, L. Ground Pine.
   In moist woods in the Black Hills.

Selaginellaceæ.—The Little Club Mosses.

Selaginella rupestris, (L.) Spring. Rock Selaginella.
   On rocky slopes in the Black Hills.

SPERMOPHYTES.—SEED BEARING PLANTS.

GYMNOSPERMAE.—GYMNOSPERMS.

Pinaceæ.

Pinus ponderosa scopulorum, Englm. Western Yellow pine.
   Throughout the Black Hills.

Picea Canadensis, (Mill.) B. S. P. White Spruce.
   In the Black Hills, especially in the northern part.

*Juniperus Sibericus.* Burgsd.

On dry knolls in the Black Hills.

**Juniperus Virginiana.** Red Cedar.

Rare in the Black Hills proper, common in the foothills and in the vicinity of streams from the Black Hills eastward to the Missouri river. It is found occasionally on the bluffs on the east side of the river.

**Juniperus Sabina prostrata,** (Pers.) Loud. Creeping Red Cedar.

On dry foothills in the Black Hills.

ANGIOSPERMÆ.—THE TRUE FLOWERING PLANTS.

MONOCOTYLEDONES.—MONOCOTYLEDONS.

**Typhaceæ.**—Cat-Tail Family.

*Typha latifolia,* L. Broad leaved Cat-tail.

In marshes throughout the state.

**Sparganiaceæ.**—The Burreed Family.

*Sparganium eurycarpum,* Englm. Broad fruited Burreed.

In swamps, marshes and along streams throughout the state.

**Naiadaceæ.** The Naiad Family.

*Potamogeton lonchites,* Tuckerm. Long-leaved Pondweed.

In ponds and slow streams through the state.

*Potamogeton amplifolius,* Tuckerm. Large-leaved Pondweed.

In ponds and slow streams throughout the state.
   In ponds and lakes from the Missouri river eastward.

   Common in the Minnesota and Sioux Valleys.

   In the Sioux river near Brookings.

   In ponds and streams throughout the state.

**Potamogeton foliosus niagarensis**, (Tuckerm.) Morong.
   In the Sioux Valley.

   In the Sioux and James valleys.

   In the Sioux valley.

**Potamogeton pusillus**, L. Small Pondweed.
   Common in ponds from the Missouri valley eastward.

**Potamogeton pectinatus**, L. Fennel-leaved Pondweed.
   In lakes and streams throughout the state.

**Potamogeton marinus occidentalis**, Robbins. The Western Pondweed.
   In the Black Hills.

**Potamogeton palustris**, L. Swamp Patamogeton.
   In shallow water in the Sioux Valley.

**Zanichellia palustris**, L. Zanichellia.
   In brackish or fresh water ponds throughout the state.

**Ruppia occidentalis**, S. Wat. Western Ruppia.
   In a strongly alkaline pond in the Minnesota valley, near Gary.

**Naias flexilis**, (Willd.) Rost & Schmidt. Slender Naias.
   In ponds and lakes throughout the state.
SCHEUCHZERIACEÆ — Arrow-Grass Family

*Triglochin palustris, L.* Marse Arrow-grass.
In bogs in the Minnesota Valley.

*Triglochin maritima, L.* Seaside Arrow-grass.
In marshes throughout the state.

ALISMACEÆ.—Water-Plantain Family.

*Alisma plantago-aquatica, L.* Water-plantain.
Common in the edges of lakes and streams throughout the state.

*Echinodorus cordifolius, (L.) Griseb.* Upright Burhead.
Occasional in the southeastern corner of the state, Sioux Falls; Yankton.

Occasional in swamps from the Missouri river eastward.

*Sagittaria arifolia, Nutt.* Arum-leaved Arrowhead.
In the Minnesota and James valleys and in the Black Hills.

*Sagittaria graminea, Michx.* Grass-leaved Sagittaria.
In shallow waters from the Missouri valley eastward.

*Sagittaria latifolia, Willd.* Broad-leaved Arrowhead.
In shallow water throughout the state.

VALLISNERIACEÆ. Tape-Grass Family.

*Philotria Canadensis, (Michx.) Britton.* Waterweed, Ditchmoss.

*Elodea Canadensis, Michx.*
In the Minnesota and Sioux river valleys.

*Vallisneria spiralis, L.* Tape-grass. Ell-grass.
In Big Stone lake, in the Minnesota valley.
   In the Bad Lands. Probably more or less abundant from the Missouri valley westward to the Black Hills.

Andropogon scoparius, Michx. Broom Beardgrass.
   Abundant throughout the state. A valuable forage grass.

Andropogon furcatus, Muhl. Forked Beardgrass.
   Abundant from the Missouri eastward.

Chrysopogon avenaceus, (Michx.) Benth. Bushy Blue-stem, Indian Grass.
   In low damp ground from the Missouri valley eastward. Locally abundant.

Syntherisima linearis, (Krock.) Nash. Small Crab Grass.
   *Panicum glabrum*. Gaud.
   Sparingly introduced into the southeastern part of the state. Near Yankton and Sioux Falls.

Syntherisima sanguinalis, (L.) Nash. Finger Grass; Large Crab Grass.
   *Panicum sanguinale*, L.
   Introduced into yards from the Missouri valley eastward.

Panicum Crus-galli, L. Barnyard Grass.
   Abundant in waste places throughout the state.

   Abundant on prairies in the Minnesota and Sioux valleys.

Panicum Wilcoxianum, Vasey. Wilcox's Panicum.
   On prairies in the Minnesota valley; rare.

Panicum dichotomum, L. Forked Panicum.
   In the Minnesota and Sioux valleys.

Panicum viscidum, Ell. Velvety Panicum.
Panicum Scoparium, Michx.
   In the Sioux valley and the Black Hills.

Panicum depauperatum, Muhl. Starved Panicum.
   In dry soils in the Sioux and James valleys and in the
   Black Hills.

Panicum virgatum, L. Tall Smooth Panicum.
   In low ground throughout the state.

Panicum Capillare, L. Witch Grass.
   A common weed in waste places throughout the state.

   Setaria glauca, L.
   A miserable weed in cultivated grounds throughout
   the state.

   Setaria Viridis, L.
   Same range as the last.

   Setaria Ittica, R. & S.
   Escaped along roadsides in the Sioux valley.

Cenchrus tribuloides, L. Sand Burr.
   In waste and sandy places throughout the state. More
   abundant westward.

Zizania aquatica, L. Wild Rice. Indian Rice. Water
   Oats.
   In shallow water from the Missouri river eastward.

Homalocenchrus virginicus, (Willd.) Britton. White
   Grass.
   Leersia virginica, R. & S.
   In shallow water in the Minnesota and Sioux valleys.

   Leersia oryzoides, L.
   In swampy ground from the Missouri river eastward:

Phalaris arundinacea, L. Reed. Canary Grass.
   From the Missouri valley eastward and in the Black
   Hills.
Phalaris Canariensis, L.  Canary Grass.
A European grass which has escaped in the eastern part of the state.

Hierochloe borealis.  R. & S.
From the Missouri valley eastward and in the Black Hills.

Aristida purpurea, Nutt.  Purple Aristida.
From the James valley westward, an abundant grass on the range.  It forms large bunches of dry wiry leaves that cattle will not eat or the mower cut.

Stipa Macounii.  Macoun’s Stipa.
In the Black Hills.

Stipa viridula, Trin.  Green Stipa.
Throughout the state.

Stipa avenaceae, L.  Black-oat Grass.
In the Minnesota region.

Stipa comata, Trin. & Rupr.  Western Stipa.
From the Missouri valley westward.

Stipa Sparteae, Trin.  Porcupine Grass.
In the Minnesota, Sioux, James and Missouri valleys and in the Black Hills.

Oryzopsis micrantha, (Trin. & Rupr.) Thurb.  Small flowered Mountain Rice.
From the Missouri valley westward.

Oryzopsis asperifolia, Michx.  White grained Mountain Rice.
In the Black Hills.

Oryzopsis melanocarpa, Muhl.  Black-fruited Mountain Rice.
On wooded bluffs in the Minnesota valley.

Oryzopsis cuspidata, (Nutt.) Vasey.  Silky Oryzopsis.
Throughout the state.
Oryzopsis Juncea, (Michx.) B. S. P. Slender Mountain Rice.
   In the Black Hills.

Muhlenbergia Mexicana, (L.) Trin. Meadow Muhlenbergia.
   In woods and thickets in the Minnesota, Sioux and James valleys.

Muhlenbergia racemosa, (Michx.) B. S. P.
   From the Missouri valley eastward and in the Black Hills.

   In the Minnesota region.

   In the Minnesota, Sioux and James valleys.

Muhlenbergia Wrightii, Vasey. Wright's Muhlenbergia.
   In the Black Hills.

Brachyelytrum erectum, (Schred.) Beav. Brachelytrum.
   In the Minnesota and Sioux valleys and the Black Hills.

Phleum pratense, L. Timothy.
   Escaped along streams and road sides in the Minnesota and Sioux valleys.

Alopecurus geniculatus, L. Marsh Fox-tail.
   In the Sioux valley.

   Abundant in the James and Missouri river valleys; occasional throughout the state.

   It occurs in the Sioux and the James river valleys; rare.
   In dry soils throughout the state.

Sporobolus neglectus, Nash. Small Rush-grass.
   In the Minnesota region. Collected but once along
   an old Indian trail.

   In the Missouri river to the Black Hills.

Sporobolus cryptandrus, (Torr.) Gray. Sand Drop- seed.
   In sandy soil from the Missouri river eastward.

Sporobolus heterolepis, Gray. Northern Dropseed.
   In low prairies throughout the state from the Missouri
   river eastward. In the Minnesota region it often forms
   a large part of the lowland hay.

Sporobolus asperifolius, (Nees & Meyen.) Thurber.
   Rough-leaved Dropseed.
   In dry soils from the James river valley westward.

Cimna Arundinacea, L. Wood Reed-grass.
   In the southern part of the Sioux valley.

Cinna latifolia, (Trev.) Griseb. Slender Wood Reed- grass.
   Cinna Pendula, Trin.
   In woods in the Sioux valley near Brookings.

Agrostis alba, L. Red-top.
   Sparingly introduced in the Minnesota and Sioux
   river valleys.

Agrostis exerata, Trin. Rough-leaved Bent-grass.
   In the Black Hills.

Agrostis canina, L. Brown Bent-grass.
   In the Missouri river valley; rare.

Agrostis perennans, (Walt.) Tuckerm. Thin-grass.
   In rich woods in the Minnesota valley and the Black
   Hills.
Agrostis hyemalis, (Walt.) B. S. P. Rough Hair-grass.  
*Agrostis scabra*. Willd.

A rather uncommon grass from the Missouri river eastward.

Calamagrostis macouniana, Vasey. Macoun's Reed-grass.

From the Missouri river eastward.

Calamagrostis Canadensis, (Michx.) Beauv. Blue Joint.

Common in low places, from the Missouri river eastward.

Calamagrostis breviseta, (Gray.) Scrib. Pickering's Reed-grass.

*Calamagrostis sylvatica breviseta*. Gray.

In the Black Hills.

Calamagrostis confinis, (Wild.) Nutt. Bog Reed-grass.

In the Minnesota and Sioux valleys.

Calamagrostis neglecta, (Ehrn.) Gaertn. Narrow Reed-grass.

*Calamagrostis stricta*. Beauv.

In the Sioux valley, near Brookings.

Calamagrostis Montanensis, Scrib. Montana Reed-grass.

Occasional in the Sioux and James valleys.

Calamovilfa longifolia, (Hook.) Hack. Long-leaved Reed-grass.

*Calamagrostis longifolia*. Hook.

In dry soils throughout the state.

Avena Striata, Michx. Purple Oats.

In the Black Hills.

Avena fatua, L. Wild Oats.

Introduced in the Minnesota and Sioux valleys.

Arrhenatherum Elatius, (L.) Beauv. Oat-grass.

Escaped from cultivation near Brookings.
Danthonia spicata, Beauv. Wild Oat-grass.
   In the Black Hills.

   In swamps and streams throughout the state.

Spartina gracilis, Trin. Inland Cord-grass.
   In alkaline soils along Cheyenne river in the Bad
   Lands and along Lake Traverse.

Schedonardus paniculatus, (Nutt.) Trelease. Sched-
   onnardus.
   Found occasionally along trails from the Missouri
   river to the Black Hills, also in the southern part of the
   state east of the river.

   In dry soils throughout the state, but much less com-
   mon than the next.

   Very abundant throughout the state; commonly called
   "False Buffalo Grass."

Bouteloua Curtipendula, (Michx.) Torr. Racemed
   Bouteloua.
   Common throughout the state.

   In wet places throughout the state.

   Throughout the state. It is rapidly disappearing in
   the eastern and southern part of the state.

Munroa squarrosa, (Nutt.) Torr. Munro's grass.
   On the dry plain from the Missouri valley westward.

Phragmites Phragmites, (L.) Karst. Reed-grass.
   In swamps and along the edges of streams from the
   Missouri river eastward.

Diplachne fascicularis, (Lam.) Beauv. Salt-meadow
   Diplachne.
   In alkaline Marshes east of the Missouri river.
Eragrostis pilosa, (L.) Beauv. Tufted Eragrostis.
Sparingly introduced into the eastern and southern part of the state.

Eragrostis purshii, Schrad. Pursh's Eragrostis.
In the eastern part of the state.

Eragrostis Major, Host. Strong-scented Eragrostis.
Common east of the Missouri, rare in the Black Hills.

Eragrostis hypnoides, (Lam.) B. S. P. Creeping Eragrostis.
Common on sandy shores east of the Missouri river.

East of the Missouri and in the Black Hills.

Eatonia Pennsylvanica, (De.) Gray. Pennsylvanian Eatonia.
East of the Missouri and in the Black Hills.

Common from the Missouri river westward to the Black Hills.

Catabrosia aquatica, (L.) Beauv. Waterwhirl-grass.
In swamps in the Black Hills.

Common in low alkaline soils throughout the state.

Dactylis glomerata, L. Orchard-grass.
Sparingly introduced in pastures in the extreme eastern part of the state and in the Black Hills.

Poa compressa, L. Wire-grass.
In dry places east of the Missouri river.

Poa pratensis, L. Kentucky Blue-grass.
Introduced into meadows and lawns east of the river; probably native in the Black Hills.

Poa pseudopratensis, Scrib. & Ryd. Prairie Meadow-grass.
Found near Hot Springs, in the Black Hills.
Poa *trivialis*, L. Rough Meadow-grass.
Sparingly introduced in the vicinity of Brookings.

Poa *flava*, L. False Red-top.
In swampy places in the extreme eastern part of the state; the Sioux and Little Minnesota valleys.

Poa *nemoralis*, L. Wood Meadow-grass.
On moist banks in the Sioux and James river valleys and in the Black Hills.

In wooded ravines in the Minnesota valley.

Poa *alsodes*, Gray. Grove Meadow-grass.
In damp woods in the Little Minnesota valley and in the Black Hills.

Poa *arida*, Vasey. Prairie Spear-grass.
In the Sioux and James valleys.

Poa *alpina*, L. Alpina Spear-grass.
Near Hot Springs, in the Black Hills.

In dry soils near Hot Springs.

Extends from the Missouri valley to the Black Hills.

Poa *fendleriana*, (Steud.) Vasey. Fendler's Poa.
In the Black Hills.

In the Black Hills.

Poa *annua*, L. Annual Meadow-grass.
Elk Canon, in the Black Hills.

*Glyceria nervata*, Trin.
In the Sioux and Little Minnesota valleys, and in the Black Hills.
Panicularia Americana, (Torr.) McM. Reed Meadow-grass.
Glyceria grandis, S. Wats.
Occasional in the Sioux valley and in the Black Hills.

Panicularia fluitans, (L.) Kuntz. Floating Meadow-grass.
Glyceria fluitans. R. B.
In shallow water in the Sioux valley.

Festuca octoflora, Walt. Slender Fescue.
In dry sandy soil from the James valley to the Black Hills.

Festuca ovina, L. Sheep’s Fescue.
Grows in bunches on dry prairies in the Black Hills.

Festuca Nutans, Willd. Nodding Fescue.
On shady bluffs in the Sioux and Little Minnesota valleys.

Bromus ciliatus, L. Fringed Brome.
In thickets in the Sioux, James and Little Minnesota valleys, and in the Black Hills.

Bromus Kalmii, Gray. Kalm’s Chess.
In the Black Hills.

Bromus pimpellianus. Scribner.
In the Black Hills.

A most troublesome weed in cultivated fields east of the Missouri river.

Agropyron violaceum, (Horn.) Vasey. Purplish wheat-grass.
Found occasionally on high ground, from the Missouri valley eastward. Specimens collected by Dr. Rydberg in the Black Hills were doubtfully referred to Agropyron violaceum majus.
Throughout the state. In the James and Missouri valleys it forms a great portion of the forage. It prefers a damp, heavy, somewhat alkaline soil. It is not common on the prairies in the eastern part of the state, but is becoming more abundant where the land is broken.

Agropyron tenerum, Vasey. Slender Wheat-grass.
Common on dry prairies throughout the state.

Agropyron strygosum, Beauv. Rough Wheat-grass.
In sterile soil along Indian creek in the Bad Lands.

Common in the Sioux valley and in the Black Hills, probably throughout the state.

Hordeum Jubatum, L. Squirrel-tail-grass.
A very common and troublesome weed in all waste places throughout the state.

Elymus striatus, Willd. Slender wild rye.
On banks of streams from the Missouri valley eastward, and in the Black Hills.

Elymus virginicus, L. Terrell-grass; wild rye.
Common along streams throughout the state.

Elymus canadensis, L. Nodding wild rye.
Common along streams throughout the state. Most of the material from the arid regions west of the Missouri river and in the Black Hills belongs to the variety Glaucifolius Torr.

Elymus Macounii, Vasey. Macoun's wild rye.
In the Little Minnesota valley.

Elymus Elymoides, (Raf.) Swezey. Long-bristled wild rye.
From the Missouri river westward; rare.

Elymus dasystachys, Trin. Western wild rye.
In the Black Hills.
Cyperaceæ.—The Sedge Family.

Cyperus inflexus, Muhl.  Awned Cyperus.

*Cyperus Aristatus*, of Manuals.

In damp sandy soil from the Missouri river eastward.

Cyperus Schweinitzii, Torr.  Schweinitz Cyperus.

In low, moist ground from the Missouri valley eastward.

Cyperus acuminatus, Torr. & Hook.  Short-pointed Cyperus.

In wet meadows throughout the state.

Cyperus erythrorhizos, Muhl.  Red-rooted Cyperus.

In the Sioux and James valleys.

Cyperus strigosus, L.  Straw-colored Cyperus.

In wet meadows in the little Minnesota valley.

Cyperus ovularis, (Michx.) Torr.  Globose Cyperus.

In the Sioux and Little Minnesota valleys.

In wet soil from the Missouri valley eastward. There are several specimens in the College herbarium labelled *E. Ovata*. The plants all have the pointed spike, the low broad tubercle covering the top of the achene and the short bristles of *E. Englemannii*.

In swamps and ponds in the Black Hills, James, Sioux and Little Minnesota valleys; and in the southern part of the Missouri valley.

In wet soils from the Missouri valley eastward and probably throughout the state.

Eleocharis acuminata, (Muhl.) Nees.  Flat-stemmed Spike-rush.

In the Black Hills near Hot Springs.
In springy marshes in the Sioux valley, near Brookings; rare.

In the Black Hills, near Custer.

Scirpus debilis, Pursh. Weak-stalked Club-rush.
In the Missouri valley, in Potter and Walworth counties.

Scirpus Americanus, Pers. Three-squares.

Scirpus pungens, Vahl.
In brackish, or fresh water swamps throughout the state; rare in the Black Hills.

Scirpus lacustris, L. Great Bulrush.
In lakes and ponds throughout the state.

Scirpus fluviatilis, (Torr.) Gray. River Bulrush.
On sandy shores of lakes and ponds, and along slow streams from the Missouri valley eastward throughout the state. In one locality "between 600 and 1,000 acres came up in June, 1894, and yielded from 16 to 25 bushels per acre of seed, which was used for feed for stock and chickens."

Scirpus atrovirens, Muhl. Dark-green Bulrush.
In swamps in the Sioux and Little Minnesota valleys.

Scirpus atrovirens pallidus, Britton. Pale Sedge.
In the Black Hills.

Scirpus cyperinus, (L.) Kunth. Wood-grass.
In the Black Hills, near Custer.

Eriophorum polystachyon, L. Tall Cotton-grass.
In springy bogs in the Sioux valley. Watertown, Toronto, Elkton.

Eriophorum gracile, Kock. Slender Cotton-grass.
Collected in a springy bog in the extreme eastern part of the state, near Elkton.
Carex impuliformis, Sartwell. Hop-like Sedge.
   In swamps and lake margins in the Little Minnesota
   and Sioux valleys; forming a considerable of the forage
   on low ground.

Carex festiva, Dewey. Festival Sedge.
   Very rare, in the Black Hills.

Carex utriculata, Boott. Bottle Sedge.
   In marshes in the Little Minnesota and Sioux valleys
   and in the Black Hills.

Carex hystricinna, Muhl. Porcupine Sedge.
   In springy swamps in the extreme eastern part of the
   Sioux valley.

Carex monile, Tuckerm. Necklace Sedge.
   In a springy bog near Elkton; the extreme eastern
   part of the Sioux valley.

Carex retrorsa, Schwein. Retrorse Sedge.
   In wet meadows in the Sioux and James valleys.

Carex pseudo-cyperus, L. Cyperous-like Sedge.
   In low swails and margins of ponds in the Sioux
   valley.

Carex trichocarpa, Muhl. Hairy-fruitied Sedge.
   In lakes and marshes in the Little Minnesota, the
   Sioux, and the southern part of the Missouri valley.

Carex aristata, R. Br. Awned Sedge.
   In swamps in the Sioux valley.

   On dry banks in the Sioux valley near Brookings.

Carex lanuginosa, Michx. Woolly Sedge.
   In springy swamps in the Little Minnesota, the Sioux
   and the southern part of the James and Missouri valleys.

Carex filiformis, L. Slender Sedge.
   In the Sioux valley near Brookings.
Carex stricta, Dewey.  Tussock Sedge.
   In low meadows in the Sioux and James valleys, and the southern part of the Missouri valley.

Carex Haydenii, Dewey.  Hayden's Sedge.
   In sloughs in the Little Minnesota, Sioux and the James valleys.

Carex Nebraskensis, Dewey.  Nebraska Sedge.
   In the Black Hills near Custer.

Carex longirostris, Torr.  Long-beaked Sedge.
   On damp shady banks in the Little Minnesota and Sioux valleys and in the Black Hills.

Carex Assiniboinensis, W. Boott.  Assiniboia Sedge.
   On damp shady banks in the Little Minnesota, and the northern part of the Sioux valley.

Carex capillaria, L.  Hair-like Sedge.
   On moist shady banks bordering streams in the Little Minnesota valley.

Carex grisea, Wahl.  Gray Sedge.
   In low woods in the Sioux valley near Brookings.

Carex tetanica, Schk.  Wood Sedge.
   In low ground in the Sioux valley.

Carex Meadii, Dewey.  Mead's Sedge.
   In wet meadows in the Sioux valley near Brookings.

Carex laxiflora blanda, (Dewey.) Boott.  Loose-flowered Sedge.
   In damp woods near lakes in the Little Minnesota and Sioux valleys.

Carex aurea, Nutt.  Golden-fruited Sedge.
   In the Black Hills, near Lead.

Carex Richardsonii, R. B.  Richardson's Sedge.
   In the Sioux and James valleys and in the Black Hills, not abundant.
Carex pedicellata, (Dewey.) Britton. Fibrous-rooted Sedge.
On bluffs in the Little Minnesota valley; rare.

Carex Pennsylvanica, Lam. Pennsylvania Sedge.
Very abundant in dry soils, both open and shaded.
From the Missouri valley eastward, and in the Black Hills, probably throughout the state.

Carex varia, Muhl. Emmons' Sedge.
In dry soils in the Black Hills.

Carex filifolia, Nutt. Thread-leaved Sedge.
In dry soil throughout the state, more abundant in the central and western part.

Carex stenophylla, Wahl. Involute-leaved Sedge.
In dry soil throughout the state. This plant and C. Pennsylvanica form not an inconsiderable amount of early forage.

Carex Marcida, Boott. Clustered Field Sedge.
In the Little Minnesota valley and in the Black Hills.

Carex gravida, Bailey. Heavy Sedge.
On low ground in the Sioux valley.

Carex vulpinoidea, Michx. Fox Sedge.
In the Sioux, James and Missouri valleys.

Carex Sartwellii, Dewey. Sartwell's Sedge.
In the Sioux and the Little Minnesota valleys.

Carex tenella, Schk. Soft-leaved Sedge.
Near Sylvan Lake in the Black Hills.

Carex rosea, Schk. Stellate Sedge.
On damp wooded bluffs of Bigstone Lake in the Little Minnesota valley.

Carex sterilis, Willd. Little Prickly Sedge.
In the Sioux valley near White.
Carex siccata, Dewey. Hillside Sedge.
   In the Sioux, James and Missouri valleys and in the Black Hills.

   In the Sioux valley.

Carex tribuloides Bebbii, Bailey.
   Occurs in the Black Hills.

Carex foenea, Willd. Hay Sedge.
   In the Sioux valley near Brookings; rare.

Carex Deweyana, Schwein. Dewey's Sedge.
   Occurs rather rarely in the Black Hills and in the Sioux valley.

Carex straminea, Willd. Straw Sedge.
   In dry soils in the Sioux and Little Minnesota valleys.

Carex festucacea, Willd. Fescue Sedge.
   In the Sioux valley near Brookings.

Carex Bicknellii, Britton. Bicknell's Sedge.
   Carex Straminea Crawford, Boott.
   Near Hot Springs in the Black Hills; rare.

Carex synnocephala, Carey. Dense Long-beaked Sedge.
   In low meadows in the Sioux valley, near Brookings, and in the Little Minnesota valley near outlet of Bigstone Lake.

   Araceae.—The Arum Family.

Arisaema triphyllum, (L.) Torr. Indian Turnip.
   On moist shady banks bordering lakes and streams in the Little Minnesota and the Sioux valleys.

Acorus calamus, L. Sweet Flag.
   Collected in two localities in the extreme eastern part of the state.
LEMNACEÆ.—Duckweed Family.

*Spirodella polyrhiza*, (L.) Schleid. Greater Duckweed.
   In ditches, ponds and lakes throughout the state.

*Lemma trisulca*, L. Star Duckweed.
   In ponds and pools; so far it has been collected only from the Missouri river eastward.

*Lemma minor*, L. Lesser Duckweed.
   In ponds, lakes and stagnant water throughout the state.

COMMELINACEÆ.—Spiderwort Family.

*Tradescantia virginiana*, L. Spiderwort.
   Abundant in low moist ground throughout the state.

PONTEDERIACEÆ.—Pickerelweed Family.

*Heteranthera limosa*, (Sw.) Willd. Smaller Mud Plantain.
   In muddy ponds near Dell Rapids, in the Sioux valley and at various points in the Missouri valley.

*Heteranthera dubia*, (Jacq.) McM. Water Star-grass.
  *Schollera graminea*, Gray.
   In clear water from the Missouri eastward.

JUNCACEÆ.—Rush Family.

*Juncus effusus*, L. Bog Rush.
   Common in low ground in the Sioux valley.

*Juncus bufonius*, L. Toad Rush.
   In the Black Hills; rare.

   Common in the Sioux and the James river valleys and in the Black Hills.

   Near Hot Springs, in the Black Hills.

   Near Lead City, in the Black Hills.
Juncus nodosus, L.  Knotted Rush.
   In the Sioux, the Little Minnesota, and the James
   valleys, and the Black Hills.

Juncus Torreyi, Coville.  Torrey’s Rush.
   In the Sioux, Minnesota, James and Missouri valleys,
   and in the Black Hills.

Juncus Xiphioides Montanus, Englm.  The Mountain
   Sedge.
   A rare plant near Custer, in the Black Hills.

Juncoides comosum, (Meyer.) Sheldon.  The Hairy Rush.
   In the Black Hills; rare.

   Melanthaceæ.—Bunch-Flower Family.

   In low prairies probably throughout the state, the Lit-
   tle Minnesota, Sioux, James and Missouri valleys, and in
   the Black Hills.

Zygadenus venosus, S. Wats.  Poisonous Zygadenus.
   In the Black Hills, near Hot Springs, Rapid City, etc.

Uvularia grandiflora, J. E. Smith.  Large-flowered
   Bellwort.
   In damp shady ravines in the Little Minnesota valley.

   Liliaceæ.—The Lily Family.

Leucocrinum montanum, Nutt.  Leucocrinum.
   Common in the Black Hills, Custer, Rapid City and
   the adjacent plains.

Allium tricoecum, Ait.  Wild Leek.
   In damp deep ravines in the Minnesota valley.

Allium cernuum, Both.  Nodding Wild Onion.
   In the Sioux valley and the Black Hills, abundant.

Allium stellatum, Kerr.  Prairie Wild Onion.
   Common in dry soils in the Sioux valley and in the
   Black Hills.
Allium Canadensis, L. Meadow Garlic.
    Common in low prairies in the Sioux valley.

    In dry soils in the southern part of the James and Missouri valleys.

Allium reticulatum, Don. Fraser’s Wild Onion.
    On dry prairies from the Missouri river eastward and in the Black Hills.

    In the Black Hills.

Lilium umbellatum, Pursh. Western Red Lily.
    In low prairies in the Little Minnesota valley and in the Black Hills.

Fritillaria atropurpurea, Nutt. Purple Fritillaria.
    In the Bad Lands region in the south central part of the state.

Calochortus Nuttallii, T. & G. Nuttall’s Mariposa Lily.
    In the Black Hills.

Calochortus Gunnisonii, S. Wats. Gunnison’s Mariposa Lily.
    In the Black Hills and in the Bad Lands.

Yucca glauca, Nutt. Bear-grass, Indian Soapweed.
    Common in the dry soils, especially on bluffs from the Missouri valley to the Black Hills.

Convallariaceæ.—Lily of the Valley Family.

Asparagus, Officinalis, L. Asparagus.
    Escaped in fields and timber claims in a few places; Brookings, Yankton and Dell Rapids.

    Smilacina racemosa.
    On damp, shady banks in the Sioux and Little Minnesota valleys.
Vagnera stellata, (L.) Morong. Star-flowered Solomon's Seal.

Smilacina Stellata, Nutt.

In the Little Minnesota, Sioux, James and Missouri valleys, and in the Black Hills.

Vagnera amplexicaulis, (Nutt.) Greene. Western Solomon's Seal.

Smilacina amplexicaulis, Nutt.

In the Black Hills.

Unifolium Canadense, (Desf.) Greene. False Lily-of-the-Valley.

Majanthemum Canadense, Desf.

In shady woods in the Minnesota valley and in the Black Hills.

Diosporum trachycarpum, (S. Wats.) B. & H. Rough-fruited Diosporum.

Prosartes trachycarpum, S. Wats.

In shady places in the Black Hills.

Near Sylvan Lake, in the Black Hills.

In moist Woods from the Missouri valley eastward and in the Black Hills.

Trillium erectum, L. Ill-scented Wake Robin.

In deep ravines in the Minnesota valley. Fruiting specimens were also collected in the same locality with the last which agree with T. Grandiflorum, but as no flowers were collected this is not reported as a certainty.

Smilacaceæ.—The Smilax Family.

Smilax herbacea, L. Carrion Flower.

In woods and thickets throughout the state.
Smilax hispida, Muhl. Hispid Greenbrier.
In the southern part of the Sioux valley from Sioux Falls southward and in the Southern Missouri valley to Running Water.

AMARYLLIDACEÆ.—Amaryllis Family.

Common on prairies in the Minnesota and Sioux valleys.

IRIDACEÆ.—The Iris Family.

Iris Missouriensis, Nutt. Western Flag.
In wet soils throughout the Black Hills.

Sisyrinchium augustifolium, Mill. Pointed Blue-eyed Grass.
Common from the Missouri valley eastward and in the Black Hills.

ORCHIDACEÆ.—The Orchid Family.

Cyprepedium candidum, (Willd.) Small White Ladies' Slipper.
In low, damp meadows in the Minnesota and Sioux valleys.

Cyprepedium hirsutum, Mill. Large Yellow Ladies' Slipper.
In the deep, shaded ravines of the Minnesota valley.

Cyprepedium parviflorum, Salisb. Small Yellow Ladies' Slipper.
In woods in the Minnesota valley and in the Black Hills.

Habenaria hyperborea, (L.) Tall Green Orchis.
In bogs in the Little Missouri valley and in the Black Hills.
Habenaria bracteata, (Wild.) R. Br. Long-bracted Orchis.
   In damp woods in the Little Minnesota valley and in the Black Hills.

   In low prairies in the Sioux valley near Brookings; rare.

Gyrostachys Romanzoffiana, (Cham.) MacM. Hooded Ladies' Tresses.
   *Spiranthes Romanzoffiana*, (Cham.)
   In low ground in the Sioux valley and in the Black Hills.

Peranium repens, (L.) Salisb. Lesser Rattlesnake Plaintain.
   *Goodyera repens*, R. Br.
   In the Black Hills.

   In woods in the Little Minnesota valley and in the Black Hills.

Corallorrhiza multiflora, Nutt. Large Coral-root.
   On shady banks in the Black Hills.

DICOTYLEDONES.

JUGLANDACEÆ.—Walnut Family.

Juglans nigra, L. Black Walnut.
   Occurs native only in the southeastern part of the state; Union county.
Salicaceae.—Willow Family.

Populus balsamifera, L. Balsam Poplar.
In the deep, wooded ravines of the Minnesota valley; rare. It is reported also from near Sioux Falls, but no specimens have been seen. *

Populus angustifolia, James. Narrow-leaved Cottonwood.
In the Black Hills.

Populus acuminata, Rydberg. Black Cottonwood.
Near Hot Springs in the Black Hills.

On the dry bluffs and in the spring swamps in the Minnesota valley, in the higher altitudes in the Black Hills, and in isolated patches between the Missouri river and the Black Hills. It is reported also from the Sioux valley, but no specimens have been seen.

Populus deltoides, Marsh. Cottonwood.
Around lakes and bordering streams throughout the state; common.

Salix nigra, Marsh. Black Willow.
A shrub or small tree, common along streams in the Minnesota, Sioux and James valleys.

Salix fluviatilis, Nutt. Sand-bar Willow.
Salix longifolia, Gray.
A small, slender shrub, along streams and lakes throughout the state; the commonest of the willows.

Salix Bebbiana, Sarg. Bebb’s Willow.
Salix rostrata, Richards.
In the Minnesota valley and in the Black Hills.

Salix humilis, Marsh. Prairie Willow.
Common in the Minnesota region; it is usually found on the wooded bluffs or the edge of the open prairie, acting as the advance guard of the wooded formations.

Salix discolor, Muhl. Glaucous Willow.
In cold swamps in the Minnesota valley and in the Black Hills.

Salix cordata, Muhl. Heart-leaved Willow.
Along streams throughout the state.

Salix balsamifera, (Hook.) Barrett. Balsam Willow.
In the cold spring swamps in the Minnesota region.

Salix adenophylla, (Hook.) Furry Willow.
A single specimen was collected on the shores of one of the numerous lakes found in the coteaus in the north-eastern part of the state, which is doubtfully referred to this species.

Salix myrtilloides, L. Bog Willow.
In the boggy swamps at the head of the coulies in the Minnesota region.

Betulaceæ.—The Birch Family.

Ostrya virginica, (Mill.) Iron-wood.
On wooded bluffs in the Minnesota region, and among the foot-hills in the Black Hills.

Corylus Americana, Walt. Hazelnut.
In thickets and open woods in the Minnesota and Sioux regions, and in the Black Hills.

Corylus rostrata, Ait. Beaked Hazelnut.
In the Black Hills, not as common as the last.

Betula papyrifera, Marsh. Canoe Birch.
Common in the Black Hills.

Betula occidentalis, Hook. Western Red Birch.
In the Black Hills; common.

Betula glandulosa, Michx. Scrub Birch.
A low shrub, abundant in many places in the Black Hills.
Quercus macrocarpa, Michx. Burr Oak.

In rich, open woods and on dry bluffs, in the vicinity of streams or lakes throughout the state. The White Oak (Quercus Alba) has been reported for this state, but wherever specimens were received or the locality visited, the tree proved to be one of the numerous forms of the Burr Oak. It seems very doubtful if the white oak occurs in this state.

Ulmaceæ.—The Elm Family.

Ulmus Americana, L. White Elm.

Along streams and lakes throughout the state.

Ulmus fulva, Michx. Slippery Elm.

Extends up the Sioux river to Sioux Falls, and up the Missouri river nearly to Chamberlain. A few trees were also found around Buffalo Lake in the northeastern part of the state, just west of the head waters of the Little Minnesota.

Celtis occidentalis, L. Hackberry.

In the vicinity of lakes and streams throughout the state.

Moraceæ.—The Mulberry Family.

Morus rubra, L. Red Mulberry.

This tree is found naturally only in the extreme southeastern county of the state, along the Sioux river; Elk Point.

Humulus Lupulus, L. Hops.

In thickets bordering streams and lakes throughout the state.

Cannabis sativa, L. Hemp.

Sparingly introduced into the state from the Missouri river eastward.
Urticae.—Nettle Family.

**Urtica gracilis**, Ait. Slender Nettle.
In thickets and low ground throughout the state.

**Urticastrum divaricatum**, (L.) Kuntze. Wood Nettle.
*Laportea Canadensis*, Gaud.
In low, rich woods from the Missouri river eastward.

**Adicea Pumila**, (L.) Raf. Clearweed.
*Pilea pumila*, Gray.
In damp, shady ground in the Minnesota and Sioux valleys.

In shady woods from the Missouri eastward, and in the Black Hills.

Santalaceae.—Sandal-wood Family.

**Comandra umbellata**, (L.) Nutt. Bastard Toad-flax.
On dry, gravelly bluffs from the Missouri valley eastward.

**Comandra pallida**, A. Dc. Pale Comandra.
From the Missouri river westward throughout the state, including the Black Hills.

Polygonaceae.—Buckwheat Family.

**Eriogonum annum**, Nutt. Annual Eriogonum.
In the Black Hills, and also extending over most of the plains region from the Missouri valley westward.

**Eriogonum multiceps**, Nees. Branched Eriogonum.
On the dry plains from the Missouri river westward, and in the Black Hills.

In the Black Hills, and in the surrounding plain region.
Eriogonum flavum, Nutt. Yellow Eriogonum.
   In the Black Hills.

Rumex acetosella, L. Sheep Sorrel.
   A European weed introduced into pastures and timber
   claims, etc., in the Sioux valley and in the Black Hills.

Rumex venosus, Pursh. Veined Dock.
   From the bluffs of the Missouri river westward, in-
   cluding the Black Hills.

Rumex altissimus, Wood. Peach-leaved Dock.
   Common along streams and in wet ground from the
   Missouri valley eastward.

Rumex salicifolius, Weinm. Pale Dock.
   In low ground near lakes and streams throughout the
   state.

Rumex Britannica, L. Great-water Dock.
   In the Minnesota and Sioux valleys.

Rumex occidentalis, S. Wats. Western Dock.
   On the plains west of the Missouri river, and in the
   Black Hills.

Rumex crispus, L. Curled Dock.
   Sparingly introduced into the state from the Missouri
   river eastward, and in the Black Hills.

Rumex persicarioides, L. Golden Dock.
   Abundant on damp, shady shores from the Missouri
   valley eastward.

Polygonum viviparum, L. Alpine Bistort.
   In damp, mossy places in the Black Hills.

Polygonum amphibium, L. Water persicaria.
   In shallow water in the Minnesota, the Sioux and the
   James valleys.

Polygonum Hartwrightii, Gray. Hartwright's Persi-
   caria.
   In the Sioux valley; rare.
   In swamps and edges of ponds throughout the state.

Polygonum lapathifolium, L. Dock-leaved Persicaria.
   In waste places throughout the state; rare west of the Missouri, except in the Black Hills.

Polygonum lapathifolium incanum, (Schmidt.) Kock.
   Same range as the type.

Polygonum Pennsylvanicum, L. Pennsylvania Persicaria.
   In moist soil from the Missouri valley eastward.

Polygonum Persicaria, L. Ladies' Thumb.
   Common in waste places from the Missouri valley eastward, and in the Black Hills.

Polygonum hydropiper, L. Smart-weed.
   In moist places in the Minnesota and Sioux valleys.

Polygonum punctatum, Ell. Water Smart-weed.
   Polygonum acre, H. B. K.
   In cold swamps in the Minnesota valley.

Polygonum aviculare, L. Knot-grass.
   In waste ground throughout the state.

   In waste places in the Black Hills.

Polygonum erectum, L. Erect Knot-weed.
   In dry soils throughout the state.

   A common weed in dry soils, throughout the state.

Polygonum camporum, Meisn. Prairie Knot-weed.
   On prairies from the Missouri river eastward.

Polygonum tenue, Michx. Slender Knot-weed.
   In ground that has been broken from the Missouri river eastward.
In the Black Hills and near Sand Lake in the James valley.

Polygonum Convulvulus, L. Black Bind-weed.
A most troublesome weed in cultivated ground throughout the state.

Polygonum scabdens, L. Climbing False Buckwheat.
In thickets from the Missouri river eastward.

Polygonum Sawachense, Small. Western Persicaria.
Near Custer, in the Black Hills.

CHENOPODIACEÆ.—The Goosefoot Family.

Chenopodium album, L. Lamb’s-quarter. Pigweed.
A weed naturalized in waste places throughout the state.

Chenopodium glaucum, L. Oak-leaved Goosefoot.
A weed naturalized; it prefers low, alkaline soils; in the Minnesota and Sioux valleys.

Chenopodium leptophyllum, (Moq.) Nutt. Narrow-leaved Goosefoot.
In the Black Hills.

Chenopodium leptophyllum oblongifolium, Wats. The Oblong-leaved Chenopod.
Near the Cheyenne river, east of the Black Hills.

Chenopodium Boscianum, Moq. Bosc’s Goosefoot.
In woods in the Minnesota region.

Chenopodium Fremontii, S. Wats. Fremont’s Goosefoot.
In damp woods in the Black Hills.

Chenopodium Fremontii incanum, S. Wats.
In the Black Hills.

Chenopodium hybridum, L. Maple-leaved Goosefoot.
In open woods in the Minnesota and Sioux valleys, and in the Black Hills.
**Chenopodium rubrum, L.** Red Goosefoot.

In low, alkaline soils in the Sioux, Minnesota and James valleys.

**Blitum capitatum, L.** Strawberry Blight.

*Chenopodium capitatum, (L.) Wats.*

In the Black Hills.

**Cycloma atriplicifolium, (Spreng.) Coult.** Cycloma.

*Cycloma platyphyllum, Moq.*

In the foot-hills of the Black Hills, and the adjacent plains region; Rapid City, etc.

**Monolepos Nuttalliana, (R. & S.) Greene.** Monolepis.

*Monolepis chenopodioides, Moq.*

In alkaline soils in the Black Hills, and from there eastward to the Missouri river.

**Atriplex hastata, L.** Halbert-leaved Orache.

In low, alkaline places throughout the state.

**Atriplex argentea, Nutt.** Silver Orache.

In alkaline soils from the Missouri river westward.

**Atriplex canescens, (Pursh.) James.** Bushy Atriplex.

Abundant in alkaline soils from the Missouri river westward; not yet reported from the Black Hills.

**Eurotia lanata, (Pursh.) Moq.** White Sage.

In the Bad Lands, just east of the Black Hills.

**Corispermum hysopifolium, L.** Bug-seed.

In the Bad Lands, east of the Black Hills.

**Salicornia herbacea, L.** Slender Glasswort.

In low, alkaline meadows in the Minnesota region near Wilmot, and in the James valley near Iroquois.

**Dondia depressa, (Pursh.) Britton.** Western Blight.

In alkaline soils with the last throughout the state.

**Salsola tragus, L.** Russian Thistle.

In waste places throughout the state, but most abundant in the James and the Missouri valleys. A very
A troublesome weed in waste places, but easily destroyed by cultivation. When young and tender it is readily eaten by sheep.

**AMARANTHACEÆ.—AMARANTH FAMILY.**

**Amaranthus retroflexus, L.** Rough Pigweed.
An introduced weed in waste soil throughout the state, but not common in the central and western part.

**Amaranthus hybridus, L.** Slender Pigweed.
A naturalized weed in waste places from the Missouri river eastward, less common than the last.

**Amaranthus blitoides, S. Wats.** Prostrate Amaranth.
In cultivated and waste fields from the Missouri river eastward.

**Amaranthus gracizans, L.** Tumbleweed.
A common weed in cultivated ground throughout the state.

**Acnida tamariscina, (Nutt.) Wood.** Western Water-hemp.
Occasional in swamps and low places, which are somewhat brackish, from the Missouri river eastward.

**Acnida tamarascina tuberculata, (Moq.) Uline & Bray.** Tubercaled Water-hemp.
Same range as the last.

**NYCTAGINACEÆ.—FOUR-O’CLOCK FAMILY.**

**Allionia nyctaginea, Michx.** Heart-leaved Umbrellawort.
In thickets throughout the state.

**Allionia albida, Walt.** Pale Umbrellawort.
In the Black Hills.

**Allionia hirsuta, Pursh.** Hairy Umbrellawort.
In dry soil throughout the state.
Allionia linearis, Pursh. Narrow-leaved Umbrellawort. In dry soil from the Missouri valley westward.

PORTULACACEÆ.—Purslane Family.

Talinum teretifolium, Pursh. Fame-flower. On dry, rocky hills in the Sioux valley near Dell Rapids, and in the Black Hills.

Claytonia perfoliata amplexentis, Greene. Spanish Lettuce. In the Black Hills.

Portulaca oleracea, L. Pursley. Purslane. An introduced weed in cultivated grounds throughout the state.

CARYOPHYLLACEÆ.—The Pink Family.

Lychinis Drummondii, (Hook.) S. Wats. Drummond's Pink. In the Black Hills, Custer and Rapid City.

Saponaria officinalis, L. Soapwort, Bouncing Bet. Escaped from cultivation in the Sioux valley.

Alsine media, L. Chickweed. Stellaria media, Cyr. Sparingly introduced in the Sioux valley.
Alsine longifolia, (Muhl.) Britton. Long-leaved Stitchwort.
   Stellaria longifolia, Muhl.
   In the Minnesota and Sioux valley, and in the Black Hills.

Alsine borealis, (Bigel.) Britton. Northern Stitchwort.
   Stellaria borealis, Bigel.
   In cold bogs in the Minnesota and the extreme eastern part of the Sioux valley, Elkton; rare.

Agrostemma Githago, L. Corn Cockle.
   In grain fields from the Missouri river eastward.

Silena acaulis, L. Moss Champion.
   In the Black Hills, Rapid City.

Silena stellata, (L.) Ait. Starry Champion.
   In woods in the southern part of the Sioux valley; Flandreau, Sioux Falls.

Silena vulgaris, (Moench.) Garcke. Bladder Champion.
   An introduced weed in the Sioux valley near Brookings.

Silena antirrhina, L. Sleepy Catchfly.
   Occasional in low prairies in the Minnesota, Sioux and James valleys, and in the Black Hills.

Cerastium longipedunculatum, Muhl. Powderhorn.
   Abundant in moist shade in the Black Hills.

Cerastium brachypodium, (Englm.) Robinson. Short-stalked Chickweed.
   From the Missouri river eastward, and in the Black Hills.

Cerastium arvense, L. Field Chickweed.
   Same range as the last, but more abundant.

Cerastium arvense oblongifolium, (Torr.) Holl. & Brett.
   Occasional in the Sioux, the James valley, and in the Black Hills.
Arenaria Hookerii, Nutt. Hooker's Sandwort.
   In dry, rocky soil in the Black Hills, and the adjoining hills and buttes.

Arenaria verna, L. Vernal Sandwort.
   In shady, rocky soil in the Black Hills.

Arenaria stricta, Michx. Rock Sandwort.
   In sandy soil in the Black Hills.

   Arenaria lateriflora, L.
   In rich, shady soil in the Minnesota valley, and in the Black Hills.

Spergula arvensis, L. Spurey.
   A naturalized weed, sparingly introduced in the Sioux valley.

Paronychia Jamesii, T. & G. James' Whitlow-wort.
   On dry soil in the Black Hills, and the surrounding plains.

**Nymphaeaceae.**—Water Lily Family.

Nymphaea advena, Soland. Large Yellow Pond Lily.
   Nuphar advena, R. Br.
   In ponds and streams throughout the state, except in the dryer part of the plains region.

Nymphaea odorata, (Dryand.) Woods & Wood. Pond Lily.
   Quite authentic reports have been received of the occurrence of this species in a tributary of the Sioux river southeast of Brookings, in the extreme eastern part of the state, but no specimens have been seen.

**Ceratophyllaceae.**

Ceratophyllum demersum, L. Hornwort.
   One of the most abundant plants in ponds, lakes and slow streams, from the Missouri river eastward.
Ranunculaceæ.—The Crowfoot, or Buttercup Family.

Caltha palustris, L. Marsh Marigold.
   In cold, springy swamps and low meadows in the Minnesota valley.

   In rich woods near lakes and streams in the Sioux valley, and in the Black Hills.

Actaea rubra arguta, (Nutt.) Greene. Western Baneberry.
   Occurs in the Black Hills.

Actaea alba, (L.) Mill. White Baneberry.
   In the Sioux valley with the last species.

Aquilegia Canadensis, L. Wild Columbine.
   On damp, shady banks in the vicinity of lakes and streams in the Minnesota, Sioux, James, and the southern part of the Missouri valleys, and in the Black Hills.

Aquilegia Canadensis formosa, (Fisch.) Cooper.
   Occurs rarely in the Black Hills.

Aquilegia brevistyla, Hook. Small-flowered Columbine.
   On shady banks in the Black Hills.

Delphinium Carolinianum, Walt. Carolina Larkspur.
   Common in open ground from the Missouri eastward.

Delphinium bicolor, Nutt. Mewzie’s Larkspur.
   A variable species, common in the Black Hills.

Delphinium urceolatum, Jacq. Tall Larkspur.
   A single fragmentary specimen was received from Rapid City in the spring of 1898, which is very doubtfully referred to this species.

   In damp ravines in the Black Hills.

Anemone Caroliniana, Walt. Caroline Anémone.
   On prairies, especially in low places from the Missouri eastward.
Anemone multifida, Poir. Red Wind Flower.
   Occurs only in the Black Hills.

Anemone cylindrica, A. Gray. Long-fruited Anemone.
   On prairies throughout the state.

Anemone virginiana, L. Tall Anemone.
   In open woods in the Minnesota and Sioux valleys.

Anemone Canadensis, L. Canadian Anemone.
   In low ground, especially in the vicinity of woods or thickets, from the Missouri eastward.

Pulsatilla hirsutissima, (Pursh.) Britton. Pasque Flower.
   Anemone patens Nutalliana, Dc.
   Throughout the state; especially abundant on sandy bluffs and hills from the Missouri river eastward; one of the earliest flowers that blooms on the open prairie. Quite severe losses occasionally occur to the sheep industry by the formation of "hair balls" in the stomach of sheep which have eaten too greedily of this plant. The trouble most often occurs early in the spring, before the grasses have made much growth.

Clematis Virginiana, L. Virginian Virgin's Bower.
   Along streams and lakes in the Sioux, James and Minnesota valleys.

Clematis ligusticifolia, Nutt. Western Virgin's Bower.
   In thickets along streams from the Missouri westward.

Clematis Scottii, Porter. Scott's Clematis.
   In the Black Hills.

Clematis alpina tenuiloba, (Gray.) Rydberg. Alpine Clematis.
   Occurs occasionally in canons in the Black Hills.

Myosurus minimus, L. Mouse-tail.
   Occurs in low places in several localities in the James river valley, from the central part of the state southward; Kingsbury, Miner and Aurora counties.
Ranunculus delphinifolius, Torr. Yellow Water-crowfoot.

*Ranunculus multifidus*, Pursh.

In ponds and streams from the Missouri river eastward.

Ranunculus ovalis, Raf. Prairie Crowfoot.

*Ranunculus rhomboideus*, Goldie.

On prairies and banks of streams throughout the state.

Ranunculus abortivus, L. Kidney-leaved Crowfoot.

In rich woods in the Minnesota and Sioux valleys, and in the Black Hills.

Ranunculus seceleratus, L. Celery-leaved Crowfoot.

In the Sioux, the Minnesota and the southern part of the James valley, and in the Black Hills.

In low, wet ground in the Minnesota, the Sioux and the James valleys, and in the Black Hills.

Ranunculus Macounii, Britton. Macoun's Buttercup.

A common species in the Minnesota, Sioux and James valleys, and in the Black Hills.

Ranunculus pedatifidus cardiophyllus, (Hook.) Britton.

Occurs in the Black Hills.

Ranunculus septentrionalis, Poir. Swamp Buttercup.

Common in low, wet meadows in the Minnesota and Sioux valleys.

Batrachium divaricatum, (Schrank.) Wimm. Water Crowfoot.

*Ranunculus trichophyllus*, Chaix.

Common in ponds and streams throughout the state.

Oxygraphis cymbalaria, (Pursh.) Prantl. Seaside Crowfoot.

*Ranunculus cymbalaria*, Pursh.

In sandy soil throughout the state.
Thalictrum diocium, L.  Early Meadow Rue.
    Occurs occasionally from the James valley eastward; Brown and Brookings counties.

Thalictrum venulosum, Trelease.  Veiny Meadow Rue.
    In the Black Hills.

Thalictrum occidentale, Gray.  Western Meadow Rue.
    Dr. Rydberg is not quite certain of his identification of this species, as he was unable to obtain fruit.

Thalictrum purpurascens, L.  Purplish Meadow Rue.
    In thickets and woods throughout the state.

Berberidaceæ.—Barberry Family.

Berberis aquifolium, Pursh.  Trailing Mahonia.
    Berberis repens, Lindl.
    A trailing shrub, common in canons in the Black Hills.

Caulophyllum thalietroides, (L.) Michx.  Blue Cohosh.
    In rich woods in the Minnesota region.

Menispermaceæ.—Moonseed Family.

Menispermum Canadense, L.  Canada Moonseed.
    In woods and thickets along streams from the Missouri eastward.

Papaveraceæ.—Poppy Family.

    In draws and on open plains in the foot-hills to the Black Hills, and ranging eastward nearly to the Missouri river.

Sanguinaria canadensis, L.  Bloodroot.
    In damp, rich woods in the Minnesota region.

    Dicentra cucullaria, DC.
    In rich woods in the Minnesota and Sioux valleys.
  *Corydalis aurea*, Willd.
  In light soil in the Minnesota and Sioux valleys, and in the Black Hills. It was collected along a railroad embankment, and was possibly introduced from farther east.

Capnoides *curvisiliquum*, (Englm.) Kuntze. Curved-fruited Corydalis.
  *Corydalis curvisiliqua*, Englm.
  Common in the Black Hills.

**Cruciferœ.—Mustard Family.**

Stanleya *pinnata*, (Pursh.) Britton. Stanleya.
  On dry prairies in the Black Hills region.

Lepidium *virginicum*, L. Wild Pepper-grass.
  A weed in fields and roadsides in the Minnesota and Sioux valleys.

  *Lepidium intermedium*, Gray.
  A very abundant weed in cultivated fields and waste places from the Missouri river eastward.

Lepidium *incisum*, Roth. Cut-leaved Pepper-grass.
  Occurs rarely in the Black Hills.

Thalaspi *arvense*, L. Field Pepper-grass.
  Sparingly introduced in the Sioux valley near Sioux Falls. Doubtless introduced from Manitoba, where it is a troublesome weed.

Sisymbrium *officinale*, (L.) Scop. Hedge Mustard.
  A common weed in waste places from the Missouri river eastward.

Sisymbrium *altissimum*, L. Tumbling Mustard.
  A common and troublesome weed in the Minnesota valley, doubtless introduced from Assinoboiia.

  A common introduced weed in waste places.
Brassica arvensis, (L.) B. S. P.  Wild Mustard.
   Brassica sinapistrum, Bois.
   A troublesome weed in cultivated fields throughout the state, but more abundant in the eastern part. It is much more abundant and harder to eradicate in the bottom lands.

Sinapsis alba, L.  White Mustard.
   Brassica alba, Bois.
   A weed in cultivated and waste places throughout the state.

Roripa siniata, (Nutt.) A. S. Hitchcock.  Spreading Yellow-cress.
   Occasional in low places from the Missouri valley eastward.

   Nasturtium palustris, DC.
   In low, wet places throughout the state.

Roripa hispida, (Desv.) Britton.  Hispid Yellow-cress.
   Nasturtium hispidium, DC.
   Occasional in low places from the Missouri valley eastward.

   Nasturtium officinale, R. Br.
   Naturalized near Hot Springs in the Black Hills.

Roripa armoracia, (L.) A. S. Hitchcock’s Horseradish.
   Nasturtium armoracia, Fries.
   Sparingly introduced into the Sioux valley.

Cardamine bulbosa, (Schreb.) B. S. P.  Bulbous Cress.
   Cardamine rhomboida, DC.
   In shallow water and low meadows in the Minnesota and Sioux valleys.

Cardamine rotundifolia, Michx.  American Water-cress.
   In cold, springy bogs in the Minnesota region.
Cardamine pratensis, (L.) Cuckoo-flower.
Specimens collected in the cold spring swamp near Lake Traverse in the Minnesota region, one doubtfully referred to this species.

Physaria didymocarpa, (Hook.) Gray. Double Bladder-pod.
On the dry plains east of the Black Hills.

Lesquerella Spathulata, Rydberg. Low Bladder-pod.
On dry knolls in the Black Hills and the surrounding plains.

Lesquerella argentina arenosa, (Richards.) Wats. Silvery Bladder-pod.
Vesicaria arenosa, Richards.
In the Black Hills and the adjacent plains.

Capsella Bursa-pastoris, Medic.
Sparingly introduced from the Missouri eastward and in the Black Hills.

Camelina sativa, (L.) False Flax.
Occasional in flax fields and waste places in the Sioux valley and the Black Hills.

Draba Caroliniana, Walt. Carolina Whitlow-grass.
On dry, sandy knolls from the James valley westward.

Draba Caroliniana micrantha, (Mott.) Gray.
In the Black Hills.

Draba nemorosa, L. Wood Whitlow-grass.
Occasional on sandy knolls in the Sioux valley and in the Black Hills.

In the Black Hills.

Sophia incisa, (Engelm.) Greene. Western Tansy Mustard.
Sisymbrium incisum, Engelm.
Occasional throughout the state.
Sophia Hartwegiana, (Fourn.) Greene. Hastings’ Tansy Mustard.
   Sisymbrium Hartwegianum, Fourn.
   Common in dry soil in the Sioux valley.

   On prairies in the Minnesota, Sioux and James valleys and in the Black Hills.

Arabis Canadensis, L.  Sickle-pod.
   In open woods in the Minnesota valley.

   In woods in the Minnesota valley.

   ‘Arabis perfoliata, L.
   Occasional in the Minnesota and Sioux valleys and in the Black Hills.

   In the Black Hills.

Erysimum cheirantrhoides, (L.) Treachle Mustard.
   In thickets in the vicinity of streams in the Minnesota and Sioux valleys and in the Black Hills.

Erysimum inconspicuum, (S. Wats.) MacM.  Small Erysimum.
   In the Sioux valley and the Black Hills; not common.

   In the Minnesota region, near Bigstone lake.

Erysimum asperum, DC.  Western Wall-flower.
   On dry soil from the Missouri valley westward.

Matthiola fenestralis, Stock.
   There is a single specimen in the herbarium from Spring lake, Walworth county, with no note as to the extent to which it has become naturalized.
Coriaria orientalis, (L.) Dumort. Hare's-ear Mustard.
Sparingly introduced from the Missouri valley eastward, becoming troublesome in some localities.

Capparidaceae.—Caper Family.

Cleoma serrulata, Pursh. Pink Cleome.
Cleoma integifolia, T. & G.
From the Missouri valley westward; not abundant.

Polanisia trachysperma, T. & G. Clammy Weed.
On sandy and gravelly shores throughout the state.

Crassulaceae.—Orpine Family.

Sedum stenopetalum, Pursh. Western Stone Crop.
On dry, rocky knolls in the Black Hills.

Penthorum sedoides, L. Virginian Stone Crop.
Along and in streams in the Minnesota and Sioux valleys; abundant.

Saxifragaceae.—Saxifrage Family.

Saxifraga cernua, L. Nodding Saxifrage.
Near Sylvan lake, in the Black Hills.

Heuchera hispida, Pursh. Rough Heuchera, Alum-root.
In thickets from the Missouri valley eastward, and in the Black Hills.

Heuchera parviflora, Nutt. Small Flowered Alum-root.
Near Rockford in the Black Hills.

Parnassia Caroliniana, Michx. Grass of Parnassus.
In cold swamps in the Minnesota region, and one station, near Elkton, in the Sioux valley.

Parnassia parviflora, DC. Small-flowered Grass of Parnassus.
In cold swamps in the Minnesota valley and in the Black Hills.
Tellima parviflora, Hook. Small-flowered Tellima.
In the Black Hills, rare.

Grossulariaceæ.—Gooseberry Family.

Ribes gracile, Michx. Missouri Gooseberry.
Common in woods and thickets from the Missouri valley eastward.

Ribes oxyanthoides, L. Northern Gooseberry.
In the Minnesota and Sioux valleys and in the Black Hills.

Ribes lacustre, (Pers.) Poir. Swamp Gooseberry.
In the Black Hills.

Common in the Black Hills and along streams in the adjoining plains.

Ribes floridum, L'Her. Wild Black Currant.
Very common along streams from the Missouri valley eastward.

Ribes cereum, Dougl. Squaw Currant.
Common in the "draws" and canons in the Black Hills and the adjacent plains. Doubtless extending eastward nearly to the Missouri river.

Ribes aureum, Pursh. Golden or Buffalo Currant.
In thickets and along streams from the Missouri valley westward.

Rosaceæ.—Rose Family.

Common in the Black Hills.

In the Black Hills and the adjacent plains.
Spira\(\text{e}\) salicifolia, L. Willow-leaved Meadowsweet.

In moist ground in the Minnesota valley, and in the Sioux valley near Sioux Falls.

Spira\(\text{e}\) lucida, Doug. Corymbed Spiraea.

*Spira\(\text{e}\) betulifolia*, Hook.

On banks in the Black Hills.

Lu\(\text{et}\)kea ca\(\text{spes}\)tosa, (Nutt.) Kuntze. Tufted Meadowsweet.

*Spira\(\text{e}\) ca\(\text{spes}\)tosa*, Nutt.

In the Black Hills.

Rubus parviflorus, Nutt. Salmon-berry.

*Rubus mutkanus*, Mocino.

In the Black Hills.

Rubus strigosus, Michx. Red Raspberry.

Along streams and in rocky places throughout the state.

Rubus occidentalis, L. Black Raspberry.

From the Missouri river eastward. In general it is not as common as the last, especially rare in the Missouri valley.

*Rubus triflorus*, Richards.

In cold swamps in the Minnesota region and in the Black Hills.

Fragaria Virginiana, Duchesne. Strawberry.

In rather low ground throughout the state, but not abundant.

*Fragaria Vesca Americana*, Porter.

In woods in the Minnesota region, and in the Black Hills.

Potentilla arguta, Pursh. Tall Cinquefoil.

On dry prairies throughout the state.
Potentilla nivea dissecta, Wats. Snowy Cinquefoil.
A rare plant, occurring in the Black Hills near Hot Springs.

Potentilla Monspeliensis, L. Rough Cinquefoil.
Potentilla Norvegica, L.
In dry soils throughout the state.

Potentilla leucocarpa, Rydberg. Diffuse Cinquefoil.
Potentilla rivalis millegrana, S. Wats.
In the Black Hills and the Sioux valley.

Potentilla paradoxa, Nutt. Bushy Cinquefoil.
Potentilla supina, Michx.
In sandy soil throughout the state; not abundant.

Potentilla Hippiana, Lehm. Woolly Cinquefoil.
Occurs only in the Black Hills.

Potentilla hippiana diffusa, (Gray.) Lehm.
Occurs with the type in the Black Hills.

Potentilla Pennsylvanica, L. Prairie Cinquefoil.
On prairies from the Missouri valley eastward and in the Black Hills.

Potentilla fruticosa, L. Shrubby Cinquefoil.
In moist, rocky places in the Black Hills.

Potentilla anserina, L. Silver-weed.
In alkaline places from the Missouri river eastward.

Potentilla glandulosa, Lindl. Glandular Cinquefoil.
In the Black Hills.

Potentilla gracilis, Doug. Slender Cinquefoil.
In the Black Hills.

Potentilla gracilis fastigiata, (Nutt.) Wats.
Near Rockford in the Black Hills.

Potentilla concinna, Richards. Elegant Cinquefoil.
Near Custer in the Black Hills.

Potentilla concinna humistrata, Ryd.
In the Black Hills, in the vicinity of Deadwood.
**Geum ciliatum**, Pursh. Long-plumed Purple Avens.

*Geum triflorum*, Pursh.
On prairies and in thickets throughout the state.

In woods and thickets from the Missouri river eastward.

**Geum Virginianum**, L. Rough Avens.
In low ground in the Minnesota and Sioux valleys.

**Geum Macrophyllum**, Willd. Large-leaved Avens.
Near Rockford in the Black Hills.

**Geum strictum**, Ait. Yellow Avens.
Occasional throughout the state.

**Cercocarpus parvifolius**, H. & A. Small-leaved cerco-carpus.
On dry, rocky knolls in the Black Hills.

*Agrimonia eupatoria hirsuta*, Muhl.
In thickets in the Minnesota and James valley and in the Black Hills.

**Agrimonia parviflora**, Soland. Many-flowered Agrimonia.
Occasional in woods and thickets in the Minnesota and Sioux valleys and in the Black Hills.

**Rosa blanda**, Ait. Meadow Rose.
In thickets in the Minnesota and Sioux valleys.

**Rosa acicularis**. Prickly Rose.
Abundant in the Black Hills.

**Rosa woodesii**, Lindl. Wood Rose.
From the James valley westward, common only in the Black Hills.

**Pomaceæ**.—Apple Family.

**Sorbus sambucifolia**, (C. & S.) Roem. Western Mountain Ash.
Pyrus sambucifolia, C. & S.
Doubtfully reported by Dr. Rydberg as occurring near Sturgis in the Black Hills.

Along the Sioux river near Sioux Falls.

Amelanchier rotundifolia, (Michx.) Roem. Round-leaved June Berry.
Amelanchier Canadensis rotundifolia, T. & G.
In woods and thickets in the Minnesota and Sioux valleys.

Amelanchier alnifolia, Nutt. Northwestern June Berry.
Amelanchier Canadensis alnifolia, T. & G.
In thickets and on dry knolls from the James valley westward; common.

Crataegus macracantha, Lodd. Long Spined Thornapple.
Crataegus coccinea macracantha, Dudley.
Common in thickets in the Minnesota, Sioux and James valleys, and in the Black Hills.

Crataegus tomentosa mollis, Gray.
Occasional in thickets in the Minnesota, Sioux and James valleys.

Drupaceae.—Plum Family.

Prunus Americana, Marsh. Wild Plum.
Very abundant in thickets in the vicinity of lakes and streams throughout the state.

Prunus Besseyi, Bailey. Western Sand Cherry.
On bluffs and banks of streams from the James valley westward.

Prunus Pennsylvanica, L. F. Pin Cherry or Wild Red Cherry.
This species has only been reported from the Black Hills.
Prunus Virginiana, L. Choke Cherry.
Along streams and lakes throughout the state.

Prunus demissa, (Nutt.) Walp. Western Wild Cherry.
Along streams from the Missouri valley westward.

Prunus serotina, Ehrh. Black Cherry.
Rare in the Minnesota and Sioux valleys.

Mimosaceae.—Mimosa Family.

Acuan Illinoensis, (Michx.) Kuntze.
Desmanthus brachylobus, Benth.
On sandy or rocky banks of streams and lakes; occasional in the Minnesota, Sioux and James valleys.

Morongia uncinata, (Willd.) Britton. Sensitive-brier.
Schrankia uncinata, Willd.
In dry soil from the Missouri valley westward.

Caesalpinaceae.—Senna Family.

Cercis Canadensis, L. Red-bud.
This species is reported by Engelman to be found at the mouth of the Sioux river. It has not yet been collected there or elsewhere in the state. If it reaches our southeastern limit it must be quite rare.

Cassia chamæcrista, L. Sensitive Pea.
In the southern part of the Sioux and James valleys, near Sioux Falls, Elk Point and Yankton.

Gleditsia triacanthos, L. Sweet Locust.
Along the Sioux river in the extreme southeastern county, Union county.

Along the Missouri river in the two southeastern counties, Clay and Union.

Papilionaceae.—Pea Family.

Sophora sericea, Nutt. Silky Sophora.
On prairies from the Missouri valley westward.
Thermopsis rhombifolia, (Nutt.) Richards. Prairie Thermopsis.
   On banks and in draws from the Missouri valley westward.

Crotalaria sagitalis, L. Rattle-box.
   On prairies in the southern part of the state, east of the Missouri river; Union, Clay, Yankton and Charles Mix counties.

Lupinus sericeus, Pursh. Woolly Lupine.
   In the Black Hills.

Lupinus parviflorus, Nutt. Small-flowered Lupine.
   Common in the Black Hills.

Lupinus pusillus, Pursh. Low Lupine.
   Common on the dry plains from the Missouri valley westward.

Melilotus alba, Desv. White Sweet Clover.
   Sparingly naturalized in the Minnesota, Sioux and James valleys.

Melilotus officinalis, (L.) Lam. Sweet Yellow Clover.
   Escaped from cultivation in the Sioux valley near Brookings.

Trifolium procumbens, L. Low Hop Clover.
   Sparingly naturalized in the Sioux valley.

Trifolium stoloniferum, Muhl. Running Buffalo Clover.
   In low prairies and woods in the Minnesota and Sioux valleys; introduced.

Trifolium Beckwithii, Brewer. Beckwith's Clover.
   Very abundant around swails and in low meadows in the Minnesota and Sioux valleys. Our only native clover.

Trifolium repens, (L.) White Clover.
   Sparingly introduced in the Sioux valley and in the Black Hills.
Trifolium pratense, L. Red Clover.
   Sparingly naturalized in the Minnesota and Sioux valleys.

   Hosackia purshiana, Benth.
   On low, sandy land, mostly in the vicinity of streams, locally very abundant; it is the most nutritious of all our native forage crops. In cultivation, however, its growth is uncertain. The name of "Dakota Vetch" has been applied to it by J. G. Smith.

Psoralea tenuiflora, Pursh. Few-flowered Psoralea.
   Common in dry soils from the Missouri river valley westward.

Psoralea digitata, Nutt. Digitate Psoralea.
   Occasional in dry soils from the Missouri river westward.

Psoralea argophylla, Pursh. Silver-leaf Psoralea.
   Very abundant throughout the state.

Psoralea cuspidata, Pursh. Large-bracted Psoralea.
   Common on dry hills and banks from the Missouri valley westward.

Psoralea esculenta, Pursh. Prairie Turnip, "Indian Turnip."
   On sandy knolls throughout the state; common.

Psoralea lanceolata, Pursh. Lance-leaved Psoralea.
   In the southern part of the Sioux valley; uncommon.

Amorpha fruticosa, L. False Indigo. Lead Plant.
   Bordering streams and lakes throughout the state.

Amorpha nana, Nutt. Fragrant False Indigo.
   Amorpha microphylla, Pursh.
   On banks and prairies from the James valley westward to the Black Hills; also reported from Sioux Falls in the Sioux valley; more abundant from the Missouri river westward.
Amorpha canescens, Pursh. Shoe-strings. Lead-Plant.
Very abundant on prairies throughout the state.

Parosela euneandra, (Nutt.) Britton. Slender Parosela.
Dalea laxiflora, Pursh.
Common from the Missouri valley to the Black Hills.

Dalea alopecuroides, Willd.
In sandy soils from the Missouri valley eastward; occasional in the Minnesota and Sioux valleys; common in the Missouri valley.

Dalea aurea, (Nutt.)
On bluffs and loose soils from the Missouri valley westward.

Petalstemon candidus, Michx.
Very common on prairies throughout the state.

Kuhnistera compacta, (Spreng.) Kuntze. Dense-flowered Prairie Clover.
Petalstemon compacta, Swezey.
Occasional on dry plains from the Missouri valley westward.

Kuhnistera purpurea, (Vent.) MacM. Violet Prairie Clover.
Petalstemon violaceus, Michx.
Common throughout the state; especially abundant in sandy or gravelly soils.

Petalstemon villosus, Nutt.
In the Bad Lands, east of the Black Hills.

Astragalus crassicarpus, Nutt. Buffalo Pea, Ground Plum.
Astragalus caryocarpus, Ker.
Very common on prairies throughout the state.
Astragalus Mexicanus, DC. Larger Ground Plum.
In the Sioux valley, near Brookings.

Astragalus Plattensis, Nutt. Platte Milk Vetch.
In the Sioux valley near Sioux Falls, and in the Black Hills.

Astragalus Carolinianus, L. Carolina Milk Vetch.
Astragalus Canadensis, L.
In sandy soil and waste places in the Minnesota and Sioux valleys and in the Black Hills.

Astragalus adsurgens, Pall. Ascending Milk Vetch.
On prairies throughout the state.

Astragalus hypoglottis, L. Cock’s-head.
Abundant from the Missouri valley eastward, and in the Black Hills.

Astragalus Drummondii, Dougl. Drummond’s Milk Vetch.
In the Black Hills, near Hot Springs.

Astragalus racemosus, Pursh. Racemose Milk Vetch.
Abundant in heavy soils from the Missouri river westward; occasional in the James valley.

Astragalus bisulcatus, (Hook.) Gray. Grooved Milk Vetch.
In the foot-hills of the Black Hills, and in the adjoining plains.

Astragalus lotiflorus, Hook. Low Milk Vetch.
In the Black Hills and on the adjoining plains.

Astragalus Missouriensis, Nutt. Missouri Milk Vetch.
From the Missouri valley westward; common on dry banks and hills.

Astragalus gracilis, Nutt. Slender Milk Vetch.
In dry ground in the Minnesota region, and near Hot Springs in the Black Hills.

Common in the Black Hills.
Astragalus flexuosus, (Hook.) Dougl. Flexile Milk Vetch.
   On dry soils throughout the state.

Astragalus aboriginum, Richards. Indian Milk Vetch.
   Near Deadwood, in the Black Hills.

Astragalus aboriginum glaberiusculus, (Hook.) Rydberg. Indian Milk Vetch.
   In the Black Hills.

Astragalus alpinus, L. Alpine Milk Vetch.
   In woods in the Black Hills.

Astragalus convallarius, Greene.
   Near Bull Springs in the Black Hills.

Phaca Americana, (Hook.) Rydberg. Arctic Milk Vetch.
   Phaca frigida Americana, Hook.
   On low ground in thickets in the Black Hills and the adjacent plains.

Homalobus tenellus, (Pursh.) Britton. Loose-flowered Milk Vetch.
   Astragalus tenellus, Pursh.

   Astragalus Kentrophyta, A. Gray.
   In the Bad Land region, east of the Black Hills.

Homalobus caespitosa, Nutt. Tufted Milk Vetch.
   Astragalus caespitosa, A. Gray.
   In dry soils in the Black Hills, and in the adjacent plains region.

   Astragalus caespitosa, Nutt.
   In dry soils from the Missouri river westward.

Spiesia Lamberti, (Pursh.) Kuntze. Loco-weed.
   Oxytropis Lamberti, Pursh.
   Abundant on high ground throughout the state.
Spiesia Lamberti sericea, (Nutt.) Rydberg.
   *Oxytropus sericea*, Nutt.
   Throughout the state, but more abundant from the Missouri valley westward.

   Common near Custer in the Black Hills.

   Very abundant in low ground throughout the state.

Hedysarum Americanum, (Michx.) Britton. Hedysarum.
   In the Black Hills near Rockford.

Meibomia grandiflora, (Walt.) Kuntze. Broad-leaved Tick-trefoil.
   *Desmodium acuminatum*, Michx.
   In woods in the Minnesota and Sioux valleys and up the Missouri valley to Yankton.

   *Desmodium Illinoense*, A. Gray.
   Common in thickets and low prairies in the Minnesota valley.

   In low, sandy soil in the southern part of the Sioux valley; Sioux Falls and Elk Point; up the Missouri to Yankton.

   In woods and thickets in the Minnesota and Sioux valleys and the Black Hills.

Vicia Americana truncata, (Nutt.) Brewer.
   *Vicia truncata*, Nutt.
   In or near low ground throughout the state.

Vicia linearis, (Nutt.) Greene. Narrow-leaved Vetch.
   *Vicia Americana linearis*, S. Wats.
   Common on dry prairies throughout the state.
Vicia sativa, L. Vetch. Tare.
   Introduced into waste or cultivated fields in the Sioux valley.

   On shady banks of streams and lakes in the Minnesota and Sioux valleys.

Lathyrus palustris, L. Marsh Vetchling.
   In low, moist ground from the Missouri river eastward.

Lathyrus ornatus, Nutt. Showy Vetchling.
   On banks and bluffs from the Missouri valley westward.

   Abundant in the Black Hills.

   Amphicarpa monoica, Ell.
   Near Rapid City in the Black Hills.

   Amphicarpa Pitcheri, T. & G.
   In rich woods in the Minnesota valley.

Apois apois, (L.) McM. Groundnut.
   Apois tuberosa, Moench.
   In woods and thickets in the Minnesota and Sioux valleys.

Strophostyles helvola, (L.) Britton. Trailing Wild Bean.
   Strophostyles angulosa, Ell.
   On shady banks of streams and lakes from the Missouri valley eastward; not common.

Strophostyles pauciflora, (Benth.) S. Wats. Small Wild Bean.
   On banks of streams and lakes in the Minnesota, Sioux and James valleys.
Geraniaceæ.—Geranium Family.

Geranium columbinum, L. Long-stalked Crane's Bill.
   In the southern part of the Missouri valley; Charles Mix county.

Geranium Carolinianum, L. Carolina Crane's Bill.
   In the Black Hills and the southern part of the Missouri valley.

Geranium dissectum, L. Cut-leaved Crane's Bill.
   A native of Europe; near Rapid City in the Black Hills; rare.

Geranium Richardsonii, Fisch. & Meyers. Richardson's Crane's Bill.
   The common species in the Black Hills.

Geranium viscosissimum, Fisch. & Meyers. Viscid Crane's Bill.
   Occasional in the Black Hills.

Oxalidaceæ.—Wood-sorrel Family.

Oxalis violacea, L. Violet Wood-sorrel.
   In low places in thickets and in open prairies in the Minnesota, Sioux and James valleys.

Oxalis stricta, L. Upright Yellow Wood-sorrel.
   In thickets and on prairies from the Missouri valley eastward and in the Black Hills.

Linaceæ.—Flax Family.

Linum Lewisii, Pursh. Lewis' Wild Flax.
   In the Black Hills.

Linum sulcatum, Riddell. Grooved Yellow Flax.
   In dry soil in the Minnesota, Sioux and James valleys.

Linum rigidum, Pursh. Large-flowered Yellow Flax.
   Common on dry prairies throughout the state.
Rutaceæ.—Rue Family.

Xanthoxylum Americanum, Mill. Prickly Ash.
In woods along streams and bordering lakes from the Missouri valley eastward.

Polygalaceæ.—Milkwort Family.

Polygala verticillata, L. Whorled Milkwort.
On bluffs and prairies throughout the state.

Polygala senega latifolia, T. & G.
Common in the northern part of the Black Hills.

Polygala alba, Nutt. White Milkwort.
Common from the Missouri valley eastward and in the Black Hills.

Euphorbiaceæ.—Spurge Family.

Croton Texensis, (Klotzsch.) Muell. Texas Croton.
Common in dry, sandy soils from the Missouri valley westward.

Euphorbia petaloidea, Engelm. White-flowered Spurge.
In sandy soil from the Missouri valley westward to the Black Hills.

Euphorbia Geyeri, Engelm. & Gray. Geyer's Spurge.
In dry soils from the Missouri valley westward.

Euphorbia serpyllifolia, Pers. Thyme-leaved Spurge.
Common in the Minnesota, Sioux, and James valleys.

In the southern Missouri valley; Charles Mix county.

In dry soils throughout the state; the most common species.

Euphorbia maculata, L. Milk Purslane.
In the Sioux and James valleys.
Euphorbia stictospora, Engelm. Narrow-seeded Spurge.
Common in dry soils from the Missouri valley westward.

Euphorbia nutans, Lag. Upright Spotted Spurge.

Euphorbia preslii, Guss.
In the Sioux, James and Missouri valleys, especially the eastern part.

Euphorbia hexagona, Nutt. Angled Spurge.
In dry soils from the Missouri valley westward.

Euphorbia marginata, Pursh. White Margined Spurge.
Along the Missouri river in the southern part of the state and thence westward.

Euphorbia dentata, Michx. Toothed Spurge.
In the southern part of the Missouri valley, Charles Mix county, and in the Black Hills.

Euphorbia heterophylla, L. Various-leaved Spurge.
In the southern part of the Sioux and Missouri valleys; near Sioux Falls, Yankton and Running Water.

Euphorbia dictyosporma, F. & M. Reticulate-seeded Spurge.
In the James valley near Aberdeen, and from thence westward.

Euphorbia robusta, (Engelm.) Small. Rocky Mountain Spurge.

Euphorbia mountain robusta, Engelm.
Along the Cheyenne river and in the Black Hills; probably ranging from the Missouri valley westward.

Callitrichaceæ.—Water Starwort Family.

Callitriche palustris, L. Water Fennel.
Common in clear, cold streams throughout the state.

Callitriche autumnalis, L.
In running water in the Minnesota and Sioux valleys.
Anacardiaceæ.—Sumac Family.

*Rhus typhina*, L.  
Collected but once in the southern part of the Missouri valley, in Charles Mix county.

**Rhus glabra**, L. Smooth Sumac.  
Common on bluffs and banks of streams from the Missouri valley eastward, and in the Black Hills.

**Rhus trilobata**, Nutt. Skunkbush.  
On dry bluffs and hills from the Missouri valley westward, common; many specimens have very pubescent leaflets.

In woods and thickets throughout the state.

Celastraceæ.—Staff-tree Family.

Occasional in woods in the Sioux valley, and up the Missouri river into Charles Mix county.

**Celastrus scandens**, L. Bittersweet.  
Common in woods and thickets throughout the state.

Aceraceæ.—Maple Family.

*Acer dasycarpum*, Ehrh.  
Extends up the Sioux river to Flandreau and up the Missouri river to the western edge of Union county—the southeastern county.

*Acer saccharum*, Wang.  
Abundant in coulees and ravines, containing a clear spring creek, at the headwaters of the Little Minnesota river. There are some ten coulees extending from one
to three miles back into the coteaus in which the sugar maple is abundant. Many of the trees are sixty to seventy feet high and eight to ten feet in circumference. As soon as the creek emerges from the hills into the open prairie all the trees except the white elm, box elder and two willows disappear. The coulees are narrow and deep, and the banks are lined with springs which furnish a constant supply of water. The southernmost coulee in which maples were found is one-half mile south of Sisseton Agency.

*Acer Negundo*, L.  Box Elder.  Ash-leaved Maple.  
Abundant along lakes and streams throughout the state.

**BALSAMINACEÆ.**—Jewel-weed Family.

*Impatiens bictora*, Walt.  Spotted Touch-me-not.  
*Impatiens fulva*.  
In damp woods in the Minnesota and Sioux valleys.

*Impatiens pallida*, Nutt.  
In moist woods in the Minnesota valley.

**RHAMNACEÆ.**—Buckthorn Family.

*Ceanothus velutinus*, Dougl.  Velvety Redroot.  
In the Black Hills near Lead City.

Common in limestone districts in the Black Hills.

**VITACEÆ.**—Grape Family.

*Vitis Vulpina*, L.  Riverside Grape.  
*Vitis riparia*, Michx.  
Common along streams and bordering lakes from the Missouri river eastward.

Ampelopsis quinquefolia, Michx.
Common in same habitat as the last, the Minnesota and Sioux valleys, and in the Black Hills.

TILLIACEÆ.—Linden Family.

Tilia Americana, L. Basswood. American Linden.
Along streams and bordering lakes in the Minnesota and Sioux valleys; up the Missouri valley to Running Water.

MALVACEÆ.—Mallow Family.

Malva Sylvestris, L. High Mallow.
Sparingly introduced into waste places in the Sioux valley near Brookings.

Malva rotundifolia, L. Cheese's Running Mallow.
A naturalized weed in waste places in the Sioux valley and southern Missouri valley.

Malva verticillata crispa, L. Whorled Mallow.
In waste places in the Sioux valley.

Malvastrum coccineum, (Pursh.) A. Gray. Red Mallow.
Common on dry prairies from the James valley westward.

Abutilon abutilon, (L.) Rusby. Indian Mallow.
Abutilon avicennae, Gaertn.
An introduced weed in the southeastern part of the state.

Hibiscus trionum, L. Venice Mallow. Flower-of-an-hour.
In waste places along the Sioux valley in Union county, and up the Missouri valley to Chamberlain, Brule county.

HYPERICACEÆ.—St. Johnswort Family.

Hypericum Canadense, L. Canadian St. Johnswort.
In low ground in the Minnesota valley, and in the Black Hills.
Elatinaceæ.—Waterwort Family.

Elatine triandra, Schk. Long-stemmed Waterwort.
In mud on margins of ponds and rivers in the Minnesota valley; in the Missouri valley in Walworth county, and in White river in the plains region.

Cistaceæ.—Rock Rose Family.

Helianthemum majus, (L.) B. S. P. Hoary Frostweed.
On roadsides east of Custer in the Black Hills.

Violaceæ.—Violet Family.

Viola pedatifida, Don. Prairie Violet.
On prairies in the Minnesota, Sioux and James valleys, and in the Black Hills.

Viola obliqua, Hill. Meadow Violet.  
Viola cucullata, Ait.
Mostly along streams or in the shady places from the Missouri river eastward, and in the Black Hills.

Viola pedata, L. Bird's-foot Violet.  
On prairies in the Minnesota valley near Bigstone Lake.

Viola palustris, L. Marsh Violet.  
In moist soil near Sylvan Lake in the Black Hills.

Viola blanda, Willd. Sweet White Violet.  
In damp ground in the Black Hills.

On prairies from the James valley westward throughout the state.

Viola pubescens, Ait. Hairy Yellow Violet.  
In rich woods in Union county in the Sioux valley, and in the Black Hills. Most of the specimens referred to this species belong to the next.

Viola pubescens scabriuscula, T. & G.
In rich woods in the Minnesota and Sioux valleys, and in the Black Hills.

**Viola Canadensis**, L. Canadian Violet.
Abundant in rich woods in the Minnesota and Sioux valleys, and in the Black Hills.

**Viola arenaria**, Dc. Sand Violet.
In dry soils in the Black Hills, near Rapid City.

**Viola canina adunca**, Gray.
In the Black Hills.

**Loasaceae**.—Loasa Family.

Occasional in the Black Hills; more common in the adjacent plains.

**Mentzelia nuda**, (Pursh.) T. & G. Bractless Mentzelia.
A rare plant, reported only for the Black Hills.

**Mentzelia decapetala**, (Pursh.) Urban & Gilg. Showy Mentzelia.

**Mentzelia ornata**, T. & G.
Common in dry soils from the Missouri westward.

**Cactaceae**.—Cactus Family.

**Opuntia humifusa**, Raf. Western Prickly Pear.

**Opuntia Rafinesquii**, Engelm.
In the Black Hills and the adjacent plains region.

**Opuntia fragilis**, (Nutt.) Haw. Brittle Opuntia.
In the Black Hills; rare.

**CactusMissouriensis**, (Sweet.) Kuntze. Missouri Cactus.

**Mamillaria Missouriensis**, Sweet.
On bluffs, knolls and plains from the Missouri river westward.

**Cactus viviparus**, Nutt. Purple Cactus.

**Mamillaria vivipara**, Haw.
From the Missouri valley westward.
Elaeagnaceae.—Oleaster Family.

Elaeagnus argentea, Pursh. Silver Berry.
In limestone districts in the Black Hills.

Lepargyræa Canadensis, (L.) Greene. Canadian Buffalo Berry.
*Shepherdia Canadensis*, Nutt.
Occasional from the Missouri river to the Black Hills.

*Shepherdia argentea*, Nutt.
Common on bluffs and in thickets from the Missouri valley westward; occasional on bluffs in coulees in the Minnesota valley.

Lythraceae.—Loosestrife Family.

Ammania coccinea, Rottb. Long-leaved Ammannia.
In swampy ground from the Missouri valley eastward.

Lythrum alatum, Pursh. Wing-angled Loosestrife.
Occasional in low ground from the Missouri valley eastward.

Onagraceae.—Evening Primrose Family.

Chamaenerion angustifolium, (L.) Scop. Fireweed.
Great Willow Herb.
*Epilobium angustifolium*, L.
In open woods in the Minnesota valley and in the Black Hills.

Epilobium lineare, Muhl. Linear-leaved Willow Herb.
In swamps in the Minnesota and Sioux valleys, and in the Black Hills.

Epilobium paniculatum, Nutt. Panicled Willow Herb.
Occurs in the Black Hills.

Epilobium coloratum, Muhl. Purple-leaved Willow Herb.
In low ground in the Minnesota valley.
Epilobium adenocaulon, Haussk. Northern Willow Herb.
   In moist ground throughout the state.

Epilobium Hornemanni, Rerchenb. Hornemann’s Willow Herb.
   Near Sips Springs in the Black Hills.

Epilobium Drummondii, Kansk. Drummond’s Willow Herb.
   In the limestone district in the Black Hills.

Onagra biennis, (L.) Scop. Evening Primrose.
   Enothera biennis, L.
   Common throughout the state.

Enothera laciniata, Hill. Sinuate-leaved Evening Primrose.
   Enothera sinuata, L.
   In the Black Hills; rare.

Anogra albicaulis, (Pursh.) Britton. Prairie Evening Primrose.
   Enothera albicaulis, Pursh.
   Occasional in low ground throughout the state.

   Enothera coronopifolia, T. & G.
   In the Black Hills and on the adjacent plains.

Anogra pallida leptophylla, (Nutt.)
   Enothera pallida leptophylla, (Nutt.) T. & G.
   Enothera leptophylla, Nutt.
   Occasional in the Black Hills,

   Enothera caespitosa, (Nutt.)
   In “gumbo soils” from the Missouri valley westward; common.

*Anothera serrulata*, Nutt.
In dry soils throughout the state.

*Gaura parviflora*, Doug. Small-flowered Gaura.
In dry soil from the Missouri valley westward.

*Gaura coccinea*, Pursh. Scarlet Gaura.
In dry prairies throughout the state; more common in the James and Missouri valleys.

On dry knolls in the Black Hills and the adjacent plains.

*Circaea Lutetiana*, L. Enchanter's Nightshade.
In damp woods in the Minnesota valley and the Black Hills.

*Circaea alpina*, L. Alpine Enchanter's Nightshade.
In moist woods in the Black Hills.

**HALORAGIDACEÆ.**—Water Millfoil Family.

*Hippuris vulgaris*, L. Bottle Brush.
In shallow water in the Sioux valley and locally in the Missouri valley; Faulkton.

*Myriophyllum spicatum*, L. Spiked Water Millfoil.
Common in lakes and slow streams in the Minnesota, Sioux and James valleys.

*Myriophyllum verticillatum*, L. Whorled Water Millfoil.
In the Minnesota and Sioux valleys; not common.

In slow running water in the Sioux valley; rare.

**ARALIACEÆ.**—Ginseng Family.

*Aralia racemosa*, L. American Spikenard.
In rich woods in the Minnesota valley.
Aralia nudicaulis, L. Wild Sarsaparilla.
On shady banks in the Minnesota valley and in the Black Hills.

UMBELLIFERÆ.—Carrot Family, Umbelworts.

Daucus carota, L. Wild Carrot.
Sparingly naturalized in the Minnesota and Sioux valleys.

Heracleum lanatum, Michx. Cow Parsnip.
In woods in the Minnesota and Sioux valleys, and in the Black Hills.

Pastinaca sativa, L. Wild Parsnip.
Escaped near Rapid City, in the Black Hills.

Peucedanum nudicaule, (Pursh.) Nutt. White-flowered Parsley.
In dry soil from the Missouri valley eastward, common.

Peucedanum foeniculaceum, Nutt. Fennel-leaved Parsley.
In the James and Missouri valleys and along the White river; not common.

Peucedanum villosum, Nutt. Hairy Parsley.
In dry, clay, soils from the James valley westward; common.

Cymopterus acaulis, (Pursh.) Rydberg. Plain Cymopterus.

Cymopterus glomeratus, Raf.
On dry knolls from the Missouri valley westward.

Cymopterus montanus, T. & G. Mountain Cymopterus.
In the Black Hills and the adjacent plains.

Eryngium aquaticum, L. Button Snakeroot.
In the Sioux valley near Sioux Falls; rare.

Sanicula Marylandica, L. Black Snakeroot.
In woods in the Minnesota and Sioux valleys; common.
Sanicula canadensis, L. Short-styled Snakeroot.
Sanicula Marylandica canadensis, Torr.
In the Minnesota and Sioux valleys and in the Black Hills.

Musineon divaricaturn, (Pursh.) Nutt. Leafy Musineon.
In “gumbo soils” from the Missouri valley westward; common.

Musineon tennifolium, Nutt. Scapose Musineon.
In the Black Hills; common.

Musineon trachysperma, Nutt.
Near Hermosa in the Black Hills.

Washingtonia Claytoni, (Michx.) Britton. Wooly Sweet Cicely.
Osmorrhiza brevistylis, DC.
In the Minnesota and the southern part of the Sioux valleys (Union Co.); rare.

Washingtonia longistyUs, (Tott.) Britton. Smoother Sweet Cicely.
Osmorrhiza longistyUs, Torr.
In rich woods in the Minnesota and Sioux valleys and in the Black Hills.

Washingtonia nuda, (Torr.) Western Sweet Cicely.
Osmorrhiza nuda, Torr.
In the Black Hills, not common.

Sium cicutaefolium, Gmel. Hemlock Water Parsnip.
In swamps from the Missouri valley eastward.

Abundant in low prairies from the Missouri valley eastward.

Zizia cordata, (Walt.) DC. Heart-leaved Alexander.
On low prairies in the Minnesota and Sioux valleys and in the Black Hills. Less common than the last.
Carum carui, L. Caraway.
Sparingly introduced in the Sioux valley and in the Black Hills.

Reported by Dr. Gray for the Black Hills.

Cicuta maculata, L. Water Hemlock.
In swamps and streams from the Missouri valley eastward, and in the Black Hills.

Cicuta bulbifera, L. Bulb-bearing Water Hemlock.
In a cold spring swamp near Elkton in the extreme eastern part of the Sioux valley.

Deringia canadensis, (L.) Kuntze. Honewort.
Cryptotenia canadensis, L.
In rich woods in the Minnesota and Sioux valleys.

Berula augustifolia, Mert. & Kock.
In swamps in the Minnesota valley and in the Black Hills.

Bupleurum rotundifolium, L. Modesty.
Introduced into the Sioux valley in grass seed.

Cornaceæ.—Dogwood Family.

Cornus canadensis, L. Dwarf Cornel.
In damp woods in the Black Hills.

Cornus Baileyi, Coult. & Evans. Bailey’s Dogwood.
In the Black Hills.

Cornus asperifolia, Michx. Rough-leaved Dogwood.
Along the Missouri river and in the southern part of the state, Union, Clay and Yankton counties.

Cornus stolonifera, Michx. Red Osier.
In thickets along streams and bordering lakes throughout the state.
**Cornus amomum,** Mill.   Silky Cornel.  

*Cornus sericea, L.*  
Along the Missouri river in Yankton and Charles Mix counties.

**Pyrolaceae.—Wintergreen Family.**

*Pyrola rotundifolia, L.*  Round-leaved Wintergreen.  
In woods in the Black Hills, Lead City.

*Pyrola Elliptica, Nutt.*  Shin-leaf.  
On shady hillsides in the Black Hills.

*Pyrola chlorantha, Sw.*  Greenish-flowered Wintergreen.  
In woods in the Black Hills.

*Pyrola secunda, L.*  One-sided Wintergreen.  
In deep shady ravines in the Minnesota valley and in the Black Hills.

*Pyrola rotundifolia bracteata, (Nutt.) Gray.*  
In a cold bog near Sylvan lake in the Black Hills.

**Monotropaceae.—Indian Pipe Family.**

*Pterospora andromedea, Nutt.*  Pine Drops.  
In woods in the Black Hills; Custer and Rapid City.

*Monotropa uniflora, L.*  Indian Pipe.  
In deep, wooded ravines in the Minnesota valley; Roberts county.

**Ericaceae.—Heath Family.**

*Arctostaphylos uva-ursi, Spreng.*  Red Bearberry.  
On dry knolls in the Black Hills, and in the adjacent plains; Custer, and the Bad Lands.

**Vaccinaceae.—Huckleberry Family.**

*Vaccinium myrtillus microphyllum, Hook.*  Bilberry, Whortleberry.  
In the Black Hills.
Primulaceae.—Primrose Family.

Androsace occidentalis, Pursh. Androsace.
   In dry soils from the Missouri valley eastward; common.

Androsace septentrionalis, L. Mountain Androsace.
   In the Black Hills, Custer.

Androsace septentrionalis subulifera, Gray.
   In the foothills of the Black Hills; near Rapid City.

Steironema ciliatum, (L.) Raf. Fringed Loosestrife.
   *Lysimachia ciliata*, L.
   In damp thickets from the Missouri valley eastward, and in the Black Hills; common.

Naumbergia thrysiflora, (L.) Duby. Tufted Loosestrife.
   *Lysimachia thrysiflora*, L.
   In cold spring bogs in the Minnesota valley near Elkton in the Sioux valley, and in the Black Hills.

Centunculus minimus, L. Chaffweed.
   In the upper Missouri valley, (Walworth and Potter counties) and the Black Hills.

Dodecatheon media, L. Shooting Star, American Cowslip.
   On moist banks in the Black Hills; Rapid City, and Custer.

Oleaceae.—Olive Family.

Fraxinus lanceolata, Borck. Green Ash.
   *Fraxinus viridus*, Michx. F.
   Abundant along streams and bordering lakes throughout the state.

Fraxinus Pennsylvanicus, Marsh. Red Ash.
   *Fraxinus pubescens*, Lam.
   With the last throughout the state and rather more common.
Fraxinus Americana, L.  White Ash.
   This has been repeatedly reported for this state, but
the most authentic account of it in the state is the fol-
lowing from Prof. Williams’ note book: “Twigs sent by
Mr. Jones from Sioux Falls to Dr. Trelease were pro-
nounced to be this species.” If it occurs in the Minne-
sota or Sioux regions it is exceedingly rare, as for two
summers special effort has been made to detect it.

GENTIANACEÆ.—Gentian Family.

Gentiana detonsa, Rottb.  Fringed Gentian.
   Gentiana serrata, Gunner.
   In cold spring bogs in the Minnesota valley; one sta-
tion in the Sioux valley; Elkton.

Gentiana acuta, Michx.  Northern Gentian.
   Gentiana amarella acuta, Herder.
   Near Custer in the Black Hills.

Gentiana puberula, Michx.  Downy Gentian.
   Common on prairies in the Minnesota and Sioux val-
leys.

Gentiana Andrewsii, Griseb.  Closed Gentian.
   In low places in the Minnesota and Sioux valleys;
common.

Frasera speciosa, Dougl.  Showy Frasera.
   On dry, barren knolls in the Black Hills.

Tetragonanthus deflexus, (J. E. Smith.) Kuntze.
   Spurred Gentian.
   Swertia deflexa, J. E. Smith.
   In woods in the Black Hills.

MENYANTHACEÆ.—Buckbean Family.

Menyanthes trifoliata, L.  Buckbean.  Bogbean.
   In a cold spring bog near Elkton in the Sioux valley.
Apocynaceæ.—Dogbane Family.

*Apocynum androsaemifolium*, L.  Spreading Dogbane.
   In thickets in the Minnesota and Sioux valleys and in the Black Hills.

*Apocynum cannabinum*, L.  Indian Hemp.
   On dry banks from the Missouri valley eastward.

Asclepiadaceæ.—Milkweed Family.

   In thickets in the southern part of the Sioux valley; Union county.

*Asclepias incarnata*, L.  Swamp Milkweed.
   In swamps from the Missouri valley eastward.

*Asclepias syriaca*, L.  Common Milkweed.
   *Asclepias Cornuti*, Dec.
      On prairies and in thickets in the Minnesota and Sioux valleys.

   In low ground in the Minnesota and Sioux valleys.

   On prairies in the Minnesota and Sioux valleys, and in the Black Hills; rare.

*Asclepias verticillata*, L.  Whorled Milkweed.
   Common on banks and prairies from the Missouri valley eastward.

*Asclepias pumila*, (Gray.) Vail.  Low Milkweed.
   *Asclepias verticillata pumila*, Gray.
      Common on the dry plains from the Missouri valley westward, seems to replace the last.

   Occasional in sandy soils throughout the state.

   In the Black Hills and the adjacent plains.
On prairies in the Sioux valley; rare.

Convolvulaceæ.—Morning Glory Family.

Evolvulus pilosus, Nutt. Evolvulus. In dry plains west of the Missouri river and in the Black Hills.

Quamoclit coccinea hederifolia. Small Red Morning Glory.
Introduced in gardens near Brookings.

In dry soils from the Missouri river to the Black Hills.

Ipomœa hederaceæ, Jacq. Ivy-leaved Morning Glory.
A bad weed in fields in the Sioux valley near Brookings.

Convolvulus sepium, L. Hedge Bindweed.
In thickets from the Missouri valley eastward and in the Black Hills.

Convolvulus repens, L. Trailing Bindweed.
In cultivated and waste fields from the Missouri valley eastward.

Cuscutaceæ.—Dodder Family.

Cuscuta Epithymum, Murr. Clover Dodder.
On alfalfa in the Sioux valley in Brookings and Clark counties, and in the Black Hills. An introduced parasite, doing considerable damage to alfalfa wherever it occurs in quantity.

Cuscuta arvensis, Beyrich. Field Dodder.
On various large herbs in the Minnesota valley and in the Black Hills.

Cuscuta coryli, Engelm. Hazel Dodder.
Cuscuta inflexa, Engelm.
On large herbs throughout the state.

Cuscuta Gronovii, Willd. Gronovii's Dodder.
In the Sioux and Minnesota valleys; common.
Cuscuta paradoxa, Raf. Glomerata Dodder.  
*Cuscuta glomerata*, Choisy.  
On composites in the Minnesota and Sioux valleys.

**POLEMONIACEÆ.—**Phlox Family.

**Phlox pilosa**, L.  Downy Phlox.  
On prairies in the Minnesota and Sioux valleys.

In the Black Hills.

**Phlox Douglassii**, Hook.  Douglass’ Phlox.  
Common in the Black Hills.

**Phlox Douglassii andicola**, Britton.  
On dry table-lands in the Black Hills.

On dry knolls in the Black Hills.

**Collomia linearis**, Nutt.  Narrow-leaved Collomia.  
*Gilia linearis*, Gray.  
On dry soils from the Missouri valley westward; found also in one station in the Sioux valley.

**HYDROPHYLLACEÆ.—**Waterleaf Family.

**Hydrophyllum Virginicum**, L.  Virginian Waterleaf.  
Common in woods in the Minnesota valley; occasional in the Sioux valley.

*Ellisia nyctalea*, L.  
Common in shady, moist ground in the Minnesota valley; less common in the Sioux, James and Missouri valleys and in the Black Hills.

**BORAGINACEÆ.—**Borage Family.

**Heliotropium Curassavicum**, L.  Seaside Heliotrope.  
In saline soils in the James valley in Faulk and Beadle counties.
\[Echinospermum lappula,\] Lehm.
Sparingly introduced in the Sioux valley.

Lappula redowskii occidentalis, (Wats.) Rydberg. Western Stickseed.
Common from the Missouri river westward.

\[Echinospermum Virginicum,\] L.
In dry woods in the Minnesota valley and the Black Hills; rare.

Lappula floribunda, (Lehm.) Greene. Large-flowered Stickseed.
\[Echinospermum floribunda,\] Lehm.
In the Black Hills.

Lappula Americana, (Gray.) Rydberg. Nodding Stickseed.
\[Echinospermum deflexum Americanum,\] Gray.
In the Black Hills; rare.

Allocarya scopulorum, Greene. Mountain Allocarya.
In the southern Missouri valley; Charles Mix county.

Cryptanthe Pattersonii, (Gray.) Greene. Patterson’s Cryptanthe.
\[Krynitzkia Pattersonii,\] Gray.
In the Black Hills; Custer and Lead City.

\[Krynitzkia crassisepala,\] Gray.
In the Bad Lands, east of the Black Hills.

Oreocarya glomerata, (Pursh.) Greene. Clustered Oreocarya.
\[Krynitzkia glomerata,\] Gray.
In dry soils from the Minnesota valley westward.
Mertensia paniculata, (Ait.) Don. Tall Lungwort.
   In the Black Hills; Rockford.

Mertensia lanceolata, (Pursh.) DC. Lance-leaved Lungwort.
   Common in thickets and on plains from the Missouri valley westward.

Mertensia Sibericus, (L.) Don. Siberian Lungwort.
   Dr. Rydberg says: “A single fruiting specimen which seems to belong to this species was collected at Rockford.

Myosotis macroserma, Engelm. Large-seeded Forget-me-not.
   Near Hot Springs in the Black Hills; rare.

Myosotis sylvatica, Hoffm. Sylvan Forget-me-not.
   In damp, rich places in the high parts of the Black Hills.

Lithospermum canescens, (Michx.) Lehm. Hoary Puccoon.
   Common on prairies and in the edge of thickets from the James valley eastward.

Lithospermum angustifolium, Michx. Narrow-leaved Puccoon.
   Common on prairies throughout the state.

Onosmodium Molle, Michx. Soft-hairy False Cromwell.
   In prairies throughout the state; prefers sandy soil.

Echium vulgare, L. Viper’s Bugloss.
   Sparingly naturalized in the Sioux valley; Brookings.

Verbena urticaefolia, L. White Vervain.
   In thickets in the Minnesota and Sioux valleys, and the southern part of the Missouri valley; Charles Mix county.
Verbena hastata, L. Blue Vervain.
In thickets and moist places from the Missouri valley eastward, and in the Black Hills.

Verbena stricta, Vent. Hoary Vervain.
In moist or dry soil throughout the state.

Verbena bracteosa, Michx. Large-bracted Vervain.
On prairies throughout the state; rare east of the Missouri valley; more common westward.

Verbena bipinnatifida, Nutt.
On dry soil from the Missouri valley westward.

Lippia cuneifolia, (Tott.) Steud. Fogfruit.
Occasional in the James and Missouri valleys.

Labiatae.—Mint Family.

In moist soil in the Sioux valley.

Teucrium occidentale, Gray. Hairy Germander.
In thickets in the Minnesota, Sioux and James valleys.

Scutellaria lateriflora, L. Mad-dog Skull Cap.
In low, shady places from the Missouri valley eastward.

Scutellaria parvula, Michx. Small Skull Cap.
On low prairies in the Minnesota, Sioux, James and Missouri valleys.

Scutellaria galericulata, L. Marsh Skull Cap.
In damp ground from the Missouri valley eastward, and in the Black Hills.

Lophanthus nepetoides, Benth.
In the Minnesota valley and the southern part of the Sioux valley, at Sioux Falls; Union county. Some of the specimens from the Minnesota valley agree with A. schrophulariaefolia in the pubescence of the leaves
and stem, but have the small greenish yellow corolla of *A. nepetoides*.

**Agastache anethoidora**, (Nutt.) Britton. Fragrant Giant Hyssop.  
*Lophanthus anisatus*, Benth.  
In thickets from the Missouri valley eastward and in the Black Hills.

**Nepeta cataria**, L. Catnip.  
Sparingly introduced in the Minnesota and Sioux valleys.

**Dracocephalum parviflorum**, Nutt. American Dragonhead.  
In dry soils in the Sioux valley near Dell Rapids, and in the Black Hills.

**Prunella vulgaris**, L. Selfheal.  
In damp woods in the Black Hills.

**Physostegia Virginiana**, (L.) Benth. False Dragonhead.  
In the Minnesota, Sioux and James valleys.

**Leonurus cardiaca**, L. Motherwort.  
Naturalized in the Sioux valley near Sioux Falls.

**Stachys palustris**, L. Hedge Nettle.  
In the Minnesota and Sioux valleys, and in the Black Hills.

**Stachys aspera**, Michx. Rough Hedge Nettle.  
Near Custer in the Black Hills.

**Salvia lanceolata**, Willd. Lance-leaved Sage.  
On the dry plains from the Missouri valley westward.

**Monarda fistulosa**, L. Wild Bergamont.  
Common in thickets from the Missouri valley eastward, and in the Black Hills.

*Monarda fistulosa Mollis*, Benth.  
On prairies and plains in the Minnesota valley and westward to the Black Hills.
Hedeoma hispida, Pursh. Rough Pennyroyal.
   Common on dry prairies throughout the state.

Hedeoma Drummondii, Benth. Drummond’s Pennyroyal.
   In dry soils in the Black Hills, and in the adjacent plains.

Hyssopus officinalis, L. Hyssop.
   Sparingly naturalized in the Sioux valley near Brookings.

Lycopus rubellus, Moench. Stalked Water Hoarhound.
   In wet ground in the Minnesota and Sioux valleys.

   Lycopus sinuatus, Ell.
   Common in wet soils throughout the state.

Lycopus lucidus, Turcz. Western Water Hoarhound.
   In swamps and bogs in the Minnesota and Sioux valleys.

Mentha Canadensis, L. American Wild Mint.
   Common in moist soils throughout the state.

Solanaceae.—Potato Family.

Physalis longifolia, Nutt. Long-leaved Ground Cherry.
   In the Sioux and Missouri valleys and the Black Hills; more common westward.

Physalis lanceolata, Michx. Prairie Ground Cherry.
   On dry prairies throughout the state.

Physalis Virginiana, Mill. Virginian Ground Cherry.
   In thickets in the Minnesota and Sioux valleys, and in the Black Hills.

Physalis heterophylla, Nees. Clammy Ground Cherry.
   In the Minnesota and southern Missouri valleys, and in the Black Hills.
Physalis rotundata, Rydb. Round-leaved Ground Cherry.
   In the foothills of the Black Hills, and the adjacent plains.

Solanum nigrum, L. Black Nightshade.
   In the waste places from the Missouri valley eastward and in the Black Hills.

Solanum triflorum, Nutt. Cut-leaved Nightshade.
   In waste places in the Minnesota and Sioux valleys, and in the Black Hills.

   On dry prairies and in waste places throughout the state. From the Missouri valley eastward it is found in waste places, apparently introduced from the west. On the plains west of the Missouri river it is more abundant and apparently native.

Schrophulariaceae.—Figwort Family.

Verbascum thapsus, L. Mullen.
   Introduced into the southeastern part of the state, and in the Black Hills; rare.

   Linaria vulgaris, Mill.
   Sparingly naturalized in the Sioux valley.

   In dry soils in the Black Hills.

Schrophularia Marylandica, L. Heal-all. Maryland Figwort.
   Schrophularia nodosa Marylandica, Gray.
   In thickets from the Missouri valley eastward, and in the Black Hills.

Pentstemon cristatus, Nutt. Crested Beard-tongue.
   On dry bluffs in the Missouri valley and in the Black Hills.
**Pentstemon albidus**, Nutt. White Beard-tongue.
On prairies from the Missouri valley eastward, and in the Black Hills.

**Pentstemon gracilis**, Nutt. Slender Beard-tongue.
Common on prairies from the Missouri valley eastward, and in the Black Hills.

**Pentstemon grandiflorus**, Nutt. Large Flowered Beard-tongue.
On dry knolls and banks of ravines throughout the state.

**Pentstemon glaber**, Pursh. Smooth Beard-tongue.
On low prairies from the Missouri valley westward.

Near Hot Springs in the Black Hills, rare.

On table-lands near Hot Springs in the Black Hills.

**Collinsia parviflora**, Doug. Small-flowered Collinsia.
On dry hill sides in the Black Hills.

**Mimulus ringens**, L. Monkey Flower.
Along streams in the Minnesota and Sioux valleys.

**Mimulus Jamesii**, T. & G. James’ Monkey Flower.
In bogs and swamps in the Minnesota valley and in the Black Hills.

**Mimulus luteus**, L. Yellow Monkey Flower.
In damp, shady ground in the Black Hills near Lead City.

*Herpestris rotundifolia*, Pursh.
In shallow pools and on muddy shores from the Missouri valley eastward, and in the Black Hills.

**Ilysanthes gratioloides**, (L.) Benth. False Pempernel.

*Ilysanthes riparia*, Raf:
On muddy shores from the Missouri valley eastward.
On hill sides near Custer in the Black Hills.

Veronica Anagallis-aquatica, L. Water Speedwell.
In brooks from the Missouri valley eastward and in the Black Hills.

Veronica Americana, Schwein. American Brooklime.
In cold swamps in the Minnesota valley and in the Black Hills.

Veronica peregrina, L. Neckweed.
In low ground from the Missouri valley eastward and in the Black Hills.

Veronica officinalis, L. Common Speedwell.
Sparingly introduced in the Sioux valley.

*Veronica Virginica*, L.
On prairies in the Minnesota and Sioux valleys; rare.

*Gerardia tenuiflora macrophylla*, Benth.
On low prairies from the Missouri valley eastward.

Gerardia aspera, Dougl. Rough Gerardia.
On prairies from the Missouri valley eastward; common.

Castilleja acuminata, (Pursh.) Spreng. Painted Cup.
In woods in the Black Hills.

Castilleja sessiflora, Pursh. Prairie Painted Cup.
On dry bluffs and sandy knolls throughout the state; much more common from the Missouri valley westward.

Orthocarpus luteus, Nutt. Yellow Orthocarpus.
Occasional in dry, sandy soils throughout the state.

Pedicularis lanceolata, Michx. Swamp Lousewort.
In swamps and low prairies in the Minnesota and Sioux valleys.
Pedicularis Canadensis, L. Wood Betany. Lousewort.
In thickets in the Minnesota and Sioux valleys.

Lentibulariaceae — Bladderwort Family.

Utricularia vulgaris, L. Greater Bladderwort.
In clear water ponds and slow streams from the Missouri valley eastward.

Orobanchaceae.—Broomrape Family.

Thalesia fasiculata, (Nutt.) Britton. Yellow Cancer Root.
Aphyllon fasiculatum, Gray.
In the Missouri valley and the Black Hills; rare.

Orobanche ludoviciana, Nutt. Louisiana Broomrape.
From the Missouri valley eastward and in the Black Hills.

Phrymaceae.—Lopseed Family.

Phryma leplostachya, L. Lopseed.
In woops and thickets throughout the state.

Plantaginaceae.—Plantain Family.

Plantago major, L. Common Plantain.
Introduced into waste places throughout the state.

Introduced into waste fields in the Sioux valley.

Plantago lanceolata, L. Ribwort.
Sparingly introduced into waste places in the Sioux valley.

In low alkaline places in the Minnesota and Sioux valley.

Plantago Purshii, R. & S. Pursh’s Plantain.
Plantago patagonica gnaphalioides, Gray.
Common on dry plains from the Missouri valley westward.
Platago aristata, Michx. Large-bracted Plantain.

*Platago patagonica aristata*, A. Gray.

On the dry plains from the Missouri valley westward; not common.

**Plantago elongata**, Pursh. Slender Plantain.

*Platago pusilla*, Nutt.

On low damp prairies in the southern Missouri valley, Aurora and Charles Mix counties.

**Rubiaceae**.—Madder Family.

In woods and thickets in the Minnesota and Sioux valleys and in the Black Hills.

**Galium boreale**, L. Northern Bedstraw.

In thickets and on banks from the Missouri valley eastward and in the Black Hills.

In woods and thickets in the Minnesota and Sioux valleys and in the Black Hills; also extends up the Missouri valley into Charles Mix county.

**Galium trifidum**, L. Small Cleavers.

In spring swamps in the Minnesota and Sioux valleys.

**Galium tinctorum**, L. Wild Madder.

In low thickets in the Sioux valley.

**Caprifoliaceae**.—Honeysuckle Family.

**Sambucus racemosus**, L. Racemed Elder.

In canons in the Black Hills.

**Sambucus canadensis**, L. Sweet Elder.

In moist soil near Rapid City in the Black Hills.

**Viburnum opulus**, L. Cranberry Tree.

In damp ravines in the Minnesota valley (rare) and in the Black Hills.
Viburnum Lentago, L. Sweet Viburnum.
Common on wooded banks in the Minnesota valley and in the Black Hills; occurs also near Sioux Falls in the Sioux valley.

Linnaea borealis, L. Twinflower.
In woods in the Black Hills.

Symphoricarpus racemosus, Michx. Snowberry.
In thickets along streams and on dry banks throughout the state.

Symphoricarpus pauciflorus, (Robbins) Britton. Low Snowberry.
Symphoricarpus racemosus pauciflorus. Robbins.
On rich wooded bluffs in the Minnesota valley and in the Black Hills.

Symphoricarpus occidentalis, Hook. Wolf Berry.
Occasional in thickets in the Minnesota and Sioux valleys.

Symphoricarpus Symphoricarpus, (L.) MacM. Coral Berry.
Symphoricarpus vulgaris, Michx.
On dry banks from the Missouri valley eastward.

Common in woods and ravines in the Minnesota valley, in the Sioux valley near Sioux Falls and in the Black Hills.

Adoxaceæ.—Moschatel Family.

Adoxa moschatellina, L. Moschatel. Muskroot.
In the limestone region in the Black Hills.

Valerianaceæ.—Valerian Family.

Valeriana edulis, Nutt. Tobacco Root.
In damp soil near Rockford in the Black Hills.
Valeriana sylvatica, Banks. Wood Valerian.
In moist soils in the Black Hills.

Cucurbitaceæ.—Gourd Family.

Micranipelis lobata, (Michx.) Greene. Wild Balsam Apple.
Echinocystis lobata, T. & G.
In thickets along streams from the Missouri valley eastward.

Sicyos angulatus, L. Burr Cucumber.
In thickets along streams in the southern part of the state, east of the Missouri river; Yankton; Elk Point, and Brookings.

Campanulaceæ.—Bellwort Family.

Campanula rotundifolia, L. Harebell.
On moist rocks in the Black Hills.

Campanula aparinoides, Pursh. Marsh Bellwort.
In wet ground in the Black Hills.

Campanula Americana, L. Tall Bellflower.
In thickets in the Missouri valley from Yankton southward and up the Sioux valley to Sioux Falls.

Specularia perfoliata, A. DC.
In the southern Missouri valley (Charles Mix county), and in the Black Hills.

Lobelia syphilitica, L. Blue Cardinal Flower.
Common in low moist ground in the Minnesota and Sioux valleys and in the Black Hills.

Lobelia spicata hirtella, Gray. Prairie Lobelia.
Common on low prairies from the Missouri valley eastward.

Lobelia Kalmii, L. Brook Lobelia.
In cold spring bogs in ravines in the Minnesota valley.
Cichoriaceæ.—Chicory Family.

Tragopogon pratensis, L. Meadow Salsify.
  Naturalized in the Minnesota and Sioux valleys.

Taraxacum Taraxacum, (L.) Karst. Dandelion.
  In lawns and and waste fields from the James valley eastward and in the Black Hills.

Sonchus asper, (L.) All. Spiny Sow Thistle.
  In waste places from the Minnesota valley eastward and in the Black Hills.

Lactuca Scariola, L. Prickly Lettuce.
  In fields and waste places from the Missouri valley eastward; not abundant.

Lactuca Ludoviciana, (Nutt.) DC. Western Lettuce.
  Common on shady banks from the Missouri valley eastward and in the Black Hills.

Lactuca Canadensis, L. Tall Lettuce.
  In most thickets in the Sioux and James valleys.

Lactuca pulchella, (Pursh.) DC. Large-flowered Blue Lettuce.
  In low places from the Missouri valley eastward and in the Black Hills.

Lactuca spicata, (Lam.) Hitch. Tall Blue Lettuce.
  Lactuca leucophæa, Gray.
  In moist thickets in the Minnesota and Sioux valleys.

Lygodesmia juncea, (Pursh.) D. Don. Rush-like Lygodesmia.
  Common on breaking from the Missouri valley eastward and on dry plains from the Missouri valley westward.

Agoseris glauca, (Pursh.) Greene. Large-flowered Agoseris.
  Troximom glaucum, Pursh.
  On prairies and plains throughout the state.
Agoseris parviflora, (Nutt.) Greene. Small-flowered Agoseris.

Troximon glaucum parviflorum, Gray.
In the Black Hills and the adjoining plains.

Agoseris scorsoneræfolia, (Schrad.) Greene. Western Agoseris.
On railroad embankments near Custer, Black Hills.

Nothocalai cuspidata, (Pursh.) Greene. False Calais.

Troximon cuspidatum, Pursh.
On prairies from the Missouri valley eastward.

Crepis runcinata, (James.) T. & G. Naked Stemmed Hawksbeard.
In low moist soils in the Minnesota and Sioux valleys and in the Black Hills.

Hieracium umbellatum, L. Narrow-leaved Hawkweed.
In damp ground in the Minnesota valley and in the Black Hills.

Hieracium Canadense, Michx. Canada Hawkweed.
On shady banks in the Minnesota valley and in the Black Hills.

Hieracium Fendleri, Schut. Fendler's Hawkweed.
On dry hills near Rockford in the Black Hills.

Prenanthes alba, L.
In rich woods in the Minnesota valley.

Nabalus asper, (Michx.) T. & G. Rough White Lettuce.

Prenanthes asper, Michx.
On low prairies in the Minnesota, Sioux, James, and southern Missouri valleys and the Black Hills.

Nabalus racemosus, (Michx.) DC. Glaucous White Lettuce.

Prenanthes racemosa, Michx.
On low prairies in the Minnesota and Sioux valleys and in the Black Hills.
Ambrosiaceae.—Ragweed Family.

Iva axillaris, Pursh. Small-flowered Marsh Elder.
   In dry alkaline soils from the Missouri valley westward.

   In waste places from the Missouri valley eastward and in the Black Hills.

   In thickets and waste places from the Missouri valley eastward.

Ambrosia trifida integrifolia, (Muhl.) T. & G.
   With the type, common.

Ambrosia artemisiaefolia, L. Ragweed.
   Abundant in waste places along roads and in cultivated field from the Missouri valley eastward, rare in the Black Hills.

Ambrosia psilostachya, DC. Western Ragweed.
   In light soils throughout the state; more common from the Missouri valley westward.

   Franseria discolor, Nutt.
   In dry soils in the Black Hills and the adjoining plains.

Xanthium Canadense, Mill. American Cocklebur.
   On loose, sandy soils bordering streams and lakes from the Missouri valley eastward.

Compositae.—Thistle Family.

Vernonia fasciculata, Michx. Western Iron Weed.
   Common in low places from the Missouri valley eastward.

Eupatorium maculatum, L. Spotted Joe-Pye Weed.
   In swampy ground in the Minnesota and Sioux valleys and the Black Hills.
Eupatorium maculatum amoenum, (Pursh.) Britton.
In low ground in the Minnesota and Sioux valleys. Quite distinct from the type.

Eupatorium altissimum, L. Tall Thoroughwort.
In dry soils, near timber, in the James, Sioux and Minnesota valleys and the Black Hills.

Eupatorium perfoliatum, L. Boneset.
In swamps in the Minnesota valley, in the eastern part of the Sioux valley and in the Missouri valley near Running Water.

Eupatorium ageratoides, L. F. White Snakeroot.
On wooded bluffs in the Minnesota, Sioux, and southern James valleys, and extending up the Missouri valley to Charles Mix county.

Kuhnia glutinosa, Ell. Prairie False Boneset.
Kuhnia eupatoriooides corymbulosa, T. & G.
On prairies throughout the state, but rare west of the Missouri river.

Lacinaria squarrosa, (L.) Hill. Colicroot.
Liatris squarrosa, Willd.
In the southern Missouri valley; Yankton, Running Water and Charles Mix county.

Liatris punctata, Hook.
On prairies and plains throughout the state, very common. A form with creamy white flowers is found.

Liatris scariosa, Willd.
From the Missouri valley eastward and in the Black Hills; common.

Liatris spicata, L.
In low prairies in the Minnesota and Sioux valleys.

Gutierrezia Sarothrac, (Pursh.) Britt. & Rusby. Gutier-
rezia.
Gutierrezia Euthamiae, T. & G.
On the dry plains from the Missouri valley west-
ward.

Grindelia squarrosa, (Pursh.) Dunal. Broad-leaved
Gum Plant.
In dry soil throughout the state. It is becoming a
weed in waste places in the eastern part of the state.

Common in dry soil from the Missouri valley east-
ward and in the Black Hills. Many of the western
forms are very close to C. hispida.

Chrysothamnus Douglasii, (Gray.) Douglas’s Rayless
Goldenrod.
Bigelovia Douglasii, Gray.
In dry alkaline soils from the Missouri valley west-
ward to the Black Hills.

Eriocarpum grindelioide, Nutt. Rayless Eriocarpum.
In dry soils in the Black Hills and the surrounding
plains.

Eriocarpum spinulosum, (Nutt.) Greene. Cut-leaved
Eriocarpum.
Aplopappus spinulosus.
In dry soils throughout the state; but rare in the Min-
nesota and Sioux valleys, common westward.

Solidago flexicaulis, L. Broad-leaved Goldenrod.
Solidago latifolia, L.
On shady banks in the Minnesota valley.

Solidago erecta, Pursh. Slender Goldenrod.
On dry knolls in the Black Hills.

Solidago speciosa rigidiuscula, T. & G.
In dry soils in the Missouri and Sioux valleys.  Rare.

Solidago arguta, Ait.  Cut-leaved Goldenrod.
In rich woods in the Minnesota and Sioux valleys.

Solidago rupestris, Raf.  Rock Goldenrod.
Occasional on rocky banks in the Minnesota and Sioux valleys and in the Black Hills.

Solidago serotina, Ait.  Late Goldenrod.
In thickets and low places throughout the state except the Black Hills.

Solidago Missouriensis, Nutt.  Missouri Goldenrod.
On prairies throughout the state.

Solidago Canadensis, L.  Canada Goldenrod.
From the Missouri valley eastward and in the Black Hills; common in thickets and on low prairies.

Solidago Canadensis procera, (Ait.) T. & G.
Range the same as the type.

Solidago Canadensis gilvos canescens, Rydberg.
In dry soil in the Minnesota valley.

Solidago nemoralis, Ait.  Field Goldenrod.  Dyers Weed.
On dry banks and hills throughout the state.

Solidago Radula, Nutt.  Western Rough Goldenrod.
In dry soils throughout the state.

Solidago rigida, L.  Hard-leaved Goldenrod.
On prairies throughout the state.  The most abundant of all the species.

Euthamia graminifolia, (L.) Nutt.  Fragrant Goldenrod.

Solidago lanceolata, L.
In moist soils in the Minnesota, Sioux, and James valleys and in the Black Hills.
Euthamia Caroliniana, (L.) Greene. Slender Fragrant Goldenrod.

*Solidago tenuifolia*, Pursh.
A single specimen of the species was collected in the Black Hills by Mr. Carter in 1897.

In low moist soils from the Missouri valley eastward.

*Aster Lindleyanus*, T. & G. Lindley’s Aster.
In low ground in the Minnesota valley.

In dry soils in the Minnesota valley.

In thickets in the Minnesota, Sioux, and James valleys.

*Aster oblongifolius*, Nutt. Aromatic Aster.
In dry soils from the Missouri valley eastward; the plant is most abundant on dry gravelly hillsides.

*Aster lævis*, L. Smooth Aster.
On sandy banks of streams from the Missouri valley eastward and in the Black Hills.

*Aster patulus*, Lam. Spreading Aster.
In the Black Hills near Custer.

*Aster junceus*, Ait. Rush Aster.
In cold spring bogs in the Minnesota valley, in the extreme eastern part of the Sioux valley and in the Black Hills.

*Aster sericeus*, Vent. Western Silky Aster.
On dry prairies in the Minnesota, Sioux, and James valleys; common.

*Aster ptarmicoides*, (Nees.) T. & G. Upland White Aster.
In dry rocky or gravelly soils throughout the state.

*Aster dumosus*, L. Bushy Aster.
In damp, sandy soils in the Sioux valley.
Aster salicifolius, Lam. Willow Aster.
In low wet ground in the vicinity of streams, throughout the state.

Aster paniculatus, Lam. Panicked Aster.
In low, damp ground from the Missouri valley eastward.

Aster lateriflorus, (L.) Britton. Starved Aster.
Aster diffusis, Ait.
On shady banks in the Sioux valley.

Aster multiflorus, Ait. Dense-flowered Aster.
In dry soils, especially that have been broken, from the Missouri valley eastward.

Aster incanopilosus, (Lindl.) Sheldon. White Prairie Aster.
Aster commutatus, A. Gray.
On dry prairies throughout the state.

Aster Sibiricus, L. Siberian Aster.
Near Custer in the Black Hills.

Aster falcatus, Lindl.

Machaeranthera sessiliflora, (Nutt.) Greene. Viscid Aster.
On the dry plains from the Missouri valley westward.

Erigeron asper, Nutt. Rough Erigeron.
Erigeron glabellus, Nutt.
In dry soils in the Black Hills.

Erigeron subtrinervis, Rydberg. Three-nerved Fleabane.
On shaded hillside in the Black Hills.

Erigeron pumilus, Nutt. Low Erigeron.
On the dry plains from the Missouri valley westward.
Erigeron canus, Gray. Hoary Erigeron.
   In dry soils in the Black Hills and the adjacent plains.

Erigeron compositus, Pursh. Dwarf Fleabane.
   On exposed soils in the Black Hills.

Erigeron flagellaris, Gray. Running Fleabane.
   In rich soils in the Black Hills.

Erigeron salsuginosus, Gray.
   In dry soils in the foothills of the Black Hills and the adjacent plains.

Erigeron pulchellus, Michx. Robin's Plantain.
   \textit{Erigeron bellidifolius}, Muhl.
   On banks of streams in the Minnesota and Sioux valleys.

Erigeron Philadelphicus, L. Skevish.
   In low ground in the Minnesota, Sioux, and James valleys and in the Black Hills.

   On low prairies in the Minnesota and Sioux valleys.

Erigeron ramosus, (Walt.) B. S. P. Daisy Fleabane.
   \textit{Erigeron strigosus}, Muhl.
   In low ground and on banks throughout the state.

Erigeron ramosus Beyrichii, (F. & M.) Smith & Pound.
   In the Black Hills.

Erigeron arnerifolius, Turcz. Mountain Fleabane.
   In wet meadows in the Black Hills.

   \textit{Erigeron Canadensis}, L.
   Throughout the state; common in the eastern part of the state; rare from the Missouri valley westward.

Leptilon divaricatum, (Michx.) Raf. Purple Horseweed.
   \textit{Erigeron divaricatus}, Michx.
   In sandy soils in the Missouri valley in Walworth county, rare.
Doellingeria umbellata, (Mill.) Nees. Flat-topped White Aster.  
Aster umbellatus, Mill.  
In swampy places in shaded ravines in the Minnesota valley.

Filago prolifera, (Nutt.) Britton. Filago.  
Evax prolifera, Nutt. 
On dry hills near Hot Springs in the Black Hills.

In the borders of open woods in the Black Hills.

Antennaria neodioica, Greene. Smaller Cats-foot.  
In shady places in the Black Hills. Two of Dr. Rydberg's specimens; 795 collected near Hermosa, 793 near Hot Springs are also referred to this species. They differ from the type in having the leaves tomentose above.

Antennaria campestris, Rydberg. Prairie Cats-foot.  
On prairies throughout the state; this is the common species which has been regarded as a form of A. plantaginifolia which has not yet been collected in the state. It is likely that it occurs in the open woods in the Minnesota and Sioux valleys.

Antennaria Aprica, Greene.  
In the Bad Lands.

Antennaria parvifolia, Nutt.  
Along Spring Lake in Brown county.

Anaphalis margaritacea, (L.) B. & H.  
Antennaria margaritacea, Hook.  
In dry soils in the Black Hills.

Silphium perfoliatum, L. Cup Plant.  
In moist thickets in the Minnesota and Sioux valleys.

Silphium laciniatum, L. Compass Plant.  
In the southern part of the Sioux, James and Missouri valleys. Sioux Falls, Yankton, Charles Mix counties.
Heliopsis scabra, Dumal. Rough Ox Eye.
    Common in thickets and open woods from the Missouri valley eastward. Occasional westward along the White and Bad rivers.

Rudbeckia hirta, L. Black-eyed Susan.
    On prairies in the Minnesota and Sioux valleys and in the Black Hills.

Rudbeckia laciniata, L. Green-headed Coneflower.
    In thickets in the Minnesota, Sioux, and southern Missouri valleys as far north as Charles Mix county.

    Legachys pinnata, T. & G.
    On low prairies in the Sioux valley.

Ratibida columnaris, (Sims.) D. Dou. Prairie Coneflower.
    Legachys columnaris, T. & G.
    On prairies from the Missouri valley eastward and in the Black Hills.

Braunera pallida, (Nutt.) Britton. Pale Purple Coneflower.
    Echinacea angustifolia, DC.
    Common on prairies from the Missouri valley eastward and in the Black Hills.

Helianthus annuus, L. Common Sunflower.
    Common throughout the state.

Helianthus petiolaris, Nutt. Prairie Sunflower.
    On dry prairies throughout the state; rare from the James valley eastward.

Helianthus scaberrimus, Ell. Stiff Sunflower.
    Helianthus rigidus, Desf.
    Abundant on dry prairies throughout the state.

Helianthus Maximilianii, Schrad. Maximilian's Sunflower.
    On rather low prairies throughout the state.
   In low ground in the Minnesota and Sioux valleys; common.

Helianthus tuberosus, L. Jerusalem Artichoke.
   In moist soils in the vicinity of streams, from the Missouri valley eastward.

Helianthus tuberosus subcanescens, Gray.
   In the Sioux valley; rare.

Helianthella quinquenervis, (Hook.) Gray. Five-nerved False Sunflower.
   On dry knolls in the Black Hills.

Balsamorhiza sagittata, (Pursh.) Nutt. Balsamroot.
   In the Black Hills.

Coreopsis tinctoria, Nutt. Garden Tickseed.
   In moist soils from the Missouri valley eastward.

Cereopsis palmata, Nutt. Stiff Tickseed.
   In the Sioux valley near Sioux Falls; rare.

Bidens laevis, (L.) B. S. P. Smooth Burr Marigold.
   In wet meadows in the Black Hills.

Bidens cernua, L. Nodding Burr Marigold.
   In wet soils from the Missouri valley eastward.

   In swamps in the Sioux valley.

Bidens frondosa, L. Sticktight.
   In moist soils from the Missouri valley eastward.

Hymenopappus tenuifolius, Pursh. Woolly Hymenopappus.
   On dry plains from the Missouri valley westward.

Hymenopappus filifolius, Hook. Tufted Hymenopappus.
   On dry prairies from the Missouri valley westward.

Bahia oppositifolia, Nutt. Bahia.
   On dry plains from the Missouri valley westward.
Picradenia acaulis, (Nutt.) Britton. Stemless Picradenia.  
*Actinella acaulis*, Nutt.
In dry, gravelly or sandy soils in the Black Hills, and on the hills and buttes from the Missouri valley westward.

*Helieium autumnale*, L.  Sneezewort.
In low, wet places in the Minnesota, Sioux and James valleys.

*Gaillardia aristata*, Pursh. Great Flowered Gaillardia.
On dry gravelly banks and knolls in the Minnesota valley and the Black Hills.

*Dysodia papposa*, (Vent.) A. S. Hitchcock. Fetid Marigold.  
*Dysodia chrysanthemoides*, Lag.
In low places along streams from the James valley westward. In many places in the Missouri valley it has become a bad weed.

*Achillea Millefolium*, L.  Yarrow.
In fields and waste places in the Minnesota and Sioux valleys, and in the Black Hills.

*Anthemis Cotula*, L.  Mayweed.
In waste places from the Missouri valley eastward and in the Black Hills.

*Chrysanthemum Leucanthemum*, L. White Daisy.
Sparingly introduced in the Sioux valley.

*Tanacetum vulgare*, L.  Tansy.
Escaped from gardens in the Sioux and James valleys, rare.

*Artemisia Canadensis*, Michx. Canada Wormwood.
On sandy hillsides in the Black Hills.

*Artemisia caudata*, Michx. Wild Wormwood.
In sandy soils throughout the state.

In thickets and on prairies throughout the state.
   In the Bad Lands country just east of the Black Hills.

**Artemisia frigida**, Willd.  Wormwood Sage.
   In loose gravelly soils throughout the state.

   Introduced from the Missouri valley eastward.  A bad
   weed, native of the Northwest Territory.

**Artemisia serrata**, Nutt.  Saw-leaved Mugwort.
   In thickets and on low ground, not common.

**Artemisia longifolia**, Nutt.  Long-leaved Mugwort.
   On the dry plains from the Missouri valley westward,
   occasional in the James valley.

**Artemisia gnaphalodes**, Nutt.  Prairie Mugwort.
   Abundant on prairies throughout the state.

**Artemisia cana**, Pursh.  Hoary Sagebrush.
   On the dry plains from the Missouri valley westward.

**Petasites sagittata**, (Pursh.) Gray.  Sweet Coltsfoot.
   In the Black Hills near Rochford.

**Arnica cordifolius**, Hook.  Heart-leaved Arnica.
   On shady hillsides in the Black Hills.

**Arnica alpina**, (L.) Olin.  Arctic Arnica.  Mountain To-
   bacco.
   In canons and on shady banks in the Black Hills.

**Senecio integerrimus**, Nutt.  Entire-leaved Groundsel.
   Occasional in the Minnesota and Sioux valleys and in
   the Black Hills.

**Senecio luegens**, Richards.  Black Tipped Groundsel.
   On prairies in the Sioux and James valleys and in the
   Black Hills.

**Senecio canus**, Hook.  Silvery Groundsel.
   In dry soils in the Black Hills, a common and variable
   species.
Senecio Plattensis, Nutt.  Prairie Ragwort.
    In dry ground in the Black Hills.

Senecio Balsamitae, Muhl.  Balsam Groundsel.
    *Senecio aureus Balsamite*, T. & G.
    On prairies from the Missouri valley eastward and in
    the Black Hills; common.

Senecio aureus, L.  Golden Ragwort.
    In low, wet ground in the Minnesota and Sioux valleys.

Senecio Douglasii, DC.  Douglas' Ragwort.
    In dry soils in the plains region, along the Cheyenne
    river.

    In swamps in the Minnesota and Sioux valleys.

Senecio vulgaris, L.  Common Groundsel.
    Occurs in cultivated and waste ground in the Minne-
    sota and Sioux valleys.

Senecio eremophilus, Richards.  Mountain Ragwort.
    On dry soils in the Black Hills.

Senecio rapifolius, Nutt.
    In shady places in the Black Hills.

Senecio discoideus, (Hook.) Britton.  Northern Squaw
    Weed.
    In moist ground in the Missouri valley, Charles Mix
    county.  The specimens are typical, except that the
    achenes are sharply four-sided and hairy on the angles.

    Sparingly naturalized in shady waste places in the
    southern part of the Sioux valley and in the Minnesota
    valley.

Carduus altissimus, L.  Roadside Thistle.
    *Cnicus altissimus*, Willd.
    In fields, woods and waste places in the Minnesota
    and Sioux valleys.
Carduus discolor, (Muhl.) Nutt. Field Thistle.
_Cnicus discolor_, Muhl.
On prairies in the Minnesota and Sioux valleys.

Carduus Virginianus, L. Virginian Thistle.
_Cnicus Virginianus_, Pursh.
In woods and thickets in the Minnesota and Sioux valleys.

Carduus undulatus, Nutt. Wavy-leaved Thistle.
_Cnicus undulatus_, Gray.
On plains and prairies throughout the state.

Carduus ochrocentrus, (Gray.) Green. Yellow-spined Thistle.
_Cnicus ochrocentrus_, Gray.
In dry soils in the Black Hills.

Carduus Plattensis, Rydberg. Prairie Thistle.
In sandy soils in the southwestern part of the state.

Carduus Drummondi, (Gray).
_Cnicus Drummondi_, Gray.
In damp meadows in the Black Hills.

Carduus Carnovirens, Rydberg.
Collected near Sylvan lake in the Black Hills, by Mr. L. W. Carter. Specimens sent Dr. Rydberg were identified as this species.

Carduus arvensis, (L.) Robs. Canada Thistle.
_Cnicus arvensis_, Hoff.
Sparingly naturalized in the Sioux valley.

Centaurea Cyanus, L. Blue Bottle. Corn Flower.
Roadsides near Hot Springs in the Black Hills.
